

**COVID-19?
5G?
ILI OBOJE?**

Zdravo! Ja sam virus COVID-19 koji trenutno hara svjetom. Također, glavni sam akter ove priče.

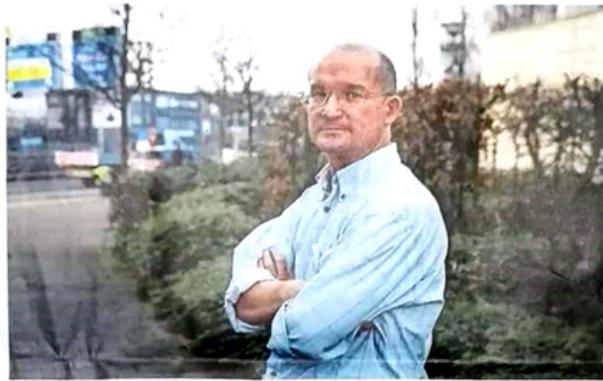

Priča započinje 22. januara 2020. godine jednim doktorom iz Belgije. Naime, Kris Van Kerckhoven, doktor opće prakse iz Puttea, blizu Antwerpena, dao je intervju koji je objavljen u lokalnim belgijskim novinama „Het Laatste Nieuws“.

WILRIJK

Huisarts Kris Van Kerckhoven uit Wilrijk hoopt op politieke moed om de uitrol van 5G tegen te houden of, als dat niet lukt, de bevolking op zijn minst te waarschuwen voor de gevaren van de draadloze verbinding. Aanleiding is een patiënt die hij vorig jaar onderzocht. Volgens Van Kerckhoven kon die patiënt duidelijk aantonen dat de klachten veroorzaakt werden door stralingen.

DAVID ACKE

Volgens dokter Kris Van Kerckhoven is er voldoende wetenschappelijk bewijs voor zijn stelling. Foto: Beeld/De Freule

„5G je opasan po život i to niko ne zna“, glasio je naslov članka u kojem je objavljen njegov intervju.

«5G is levensgevaarlijk en niemand die het weet»

In het begin denk je er het juweel van en zie je complottheoreetica. Maar gaandeweg ontdek je dat de mensen om je heen verdiepen. Zo kwam ik uit bij hele grote internationale studies die konden aantonen dat stralingen wel degelijk gevaren kunnen opleveren voor de gezondheid. De ziektes en aandoeningen eens rechtstreeks gevolg zijn van blootstelling aan stralingen. Dat vertelt dokter Kris Van Kerckhoven uit Wilrijk. Hij verzet zich tegen de uitrol van het draadloze netwerk 5G in België en als het even kan bij uitbreiding in de wereld.

Politieke moed

Van Kerckhoven zegt niet opiniën naar de middelen die terug te willen keren en de technologie aan te pakken. Hij moet op een vijfde manier gebreken. Als arts heb ik maar één doel en dat is

politieke moed duurten tot toen om financieel en economisch minister de aantrekkelijke maatregelen te nemen maar dat is wel de volksgezondheid ten goede komen.

Link met coronavirus?

Het probleem volgens de huisarts komt de politiek ten rade naast hij da coeter

al meer dan 200 artsen hun handtekening onder hebben gezet. Tot die tijd zeigt Van Kerckhoven niet mee te kunnen doen dan mensen waarschuwen en tips geven. «Bekabel opnieuw meer. Zet de WiFi uit. Schakel het 4G-netwerk uit en uit wanneer ik het niet nodig heb. Kan schade geven. Als ik aan een huis arts voorbij loop word de

Keri Hilson

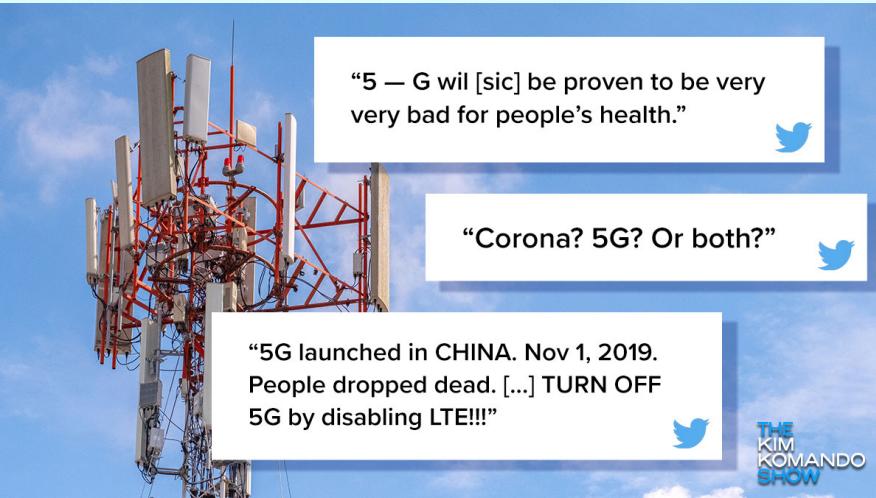

@KeriHilson

People have been trying to warn us about 5G for YEARS. Petitions, organizations, studies...what we're going thru is the affects of radiation.

5G launched in CHINA. Nov 1, 2019. People dropped dead. See attached & go to my IG stories for more. TURN OFF 5G by disabling LTE!!!

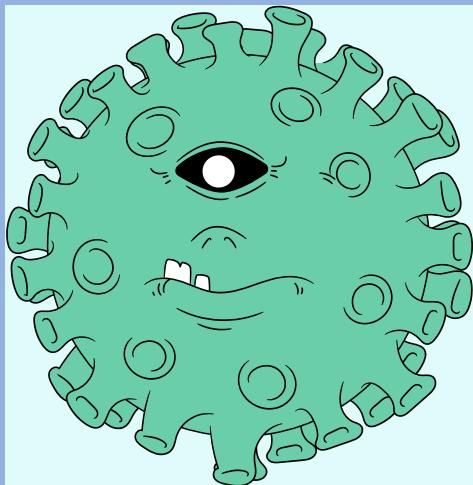

5G Corona is the **#truth** There is no damn virus, we all got sick at the same time they rolled out 5G. The other factor is the Chemtrail metallic dust they use to strengthen the signal and bounce it downwards.

Iako je naučno neutemeljena tvrdnja, jako brzo je zaintrigirala mnoge. Nakon samo nekoliko sati, verzija novina koja je sadržavala navedeni članak je obrisana sa web stranice, ali to nije zaustavilo oluju teorija koja se spremala, jer za tih nekoliko kratkih sati, članak je desetine puta prošao internetom i društvenim mrežama.

Više nije bio povratka. Nova teorija zavjere je zavladala. Zapravo ovo nije prva teorija zavjere ove vrste. Neutemeljeni strah od visokonaponskih dalekovoda je rastao 1980-ih i mobilnih telefona 1990-ih godina. Sa koronavirusu ove teorije su našle novu „kuku“ na koju su se mnogi zakačili.

China pneumonia outbreak: Mystery virus probed in Wuhan

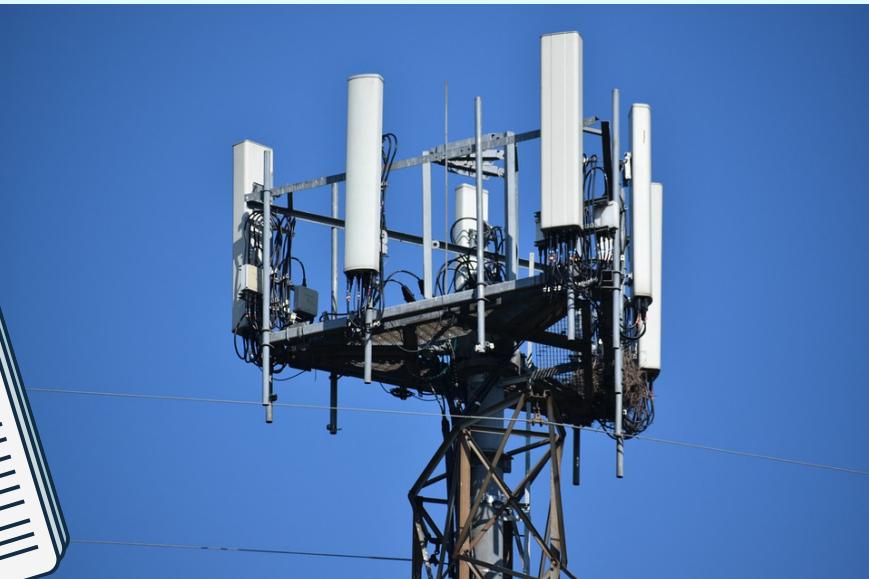

03 January 2020 | China

GETTY IMAGES

The outbreak has occurred in the city of Wuhan

Ali, kako sam ja povezan s 5G tehnologijom? Pa, Van Kerckhoven nije samo tvrdio da je 5G opasan, izjavio je i da je možda povezan s koronavirusom.

Iako je tada virus već bio zabilježen i u drugim dijelovima svijeta, smatralo se da je potekao iz kineskog grada Wuhana. Naime, od 2019. godine, oko Wuhana je izgrađena nekolicina 5G mrežnih tornjeva. Doktor je izjavio da nije provjerio činjenice, „ali to može biti veza sa trenutnim dogadjajima.“

Za samo nekoliko dana teorija zavjere nekontrolisano se širila društvenim mrežama, Facebook-om, YouTube-om i Twitter-om.

„Pročitao sam da je 5G zračenje smrtonosno, jeste li to znali?“

„Ja sam čula da ne mora biti smrtonosno za svakog ali da slabi imuni sistem i zbog toga mnogi obolijevaju i umiru od koronavirusa, koji zapravo uopšte nije toliko opasan za zdravu osobu.“

„Ma kakav virus, to je izmišljeno. Virus ni ne postoji. To što nam govore da su simptomi koronavirusa su ništa drugo nego simptomi izloženosti 5G zračenjima. Izmislili su virus da nam ne bi otkrili da nas ubijaju tehnologijom.“

„Da to je tačno. A još jedan plan im je i da „virusom“ dignu paniku među ljudima da se svi vakcinišu, jer vakcinama žele da nam upgrade čipove.“

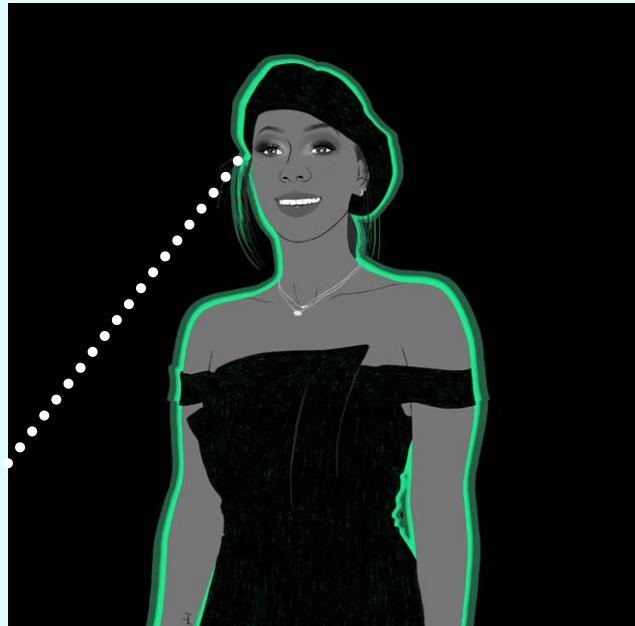

Strah je postigao nove razmjere kada su slavne ličnosti počele dijeliti izjave o teoriji stotinama hiljada ili milionima svojih sljedbenika. Institut Reuters sa Univerziteta Oxford sproveo je studiju koja je otkrila da su poznate ličnosti odgovorni za stvaranje petine svih dezinformacija o koronavirusu.

1.3 miliona pratitelja

Još veći problem je nastao i kada je teorija s interneta izbila u stvarni svijet, kroz mnoge vandalske napade. Prijavljivane su desetine incidenta mjesечно u gradovima Europe, Australije i Novog Zelanda, gdje su vandali oštetili mobilne antene podmetanjem požara koji su načinili štete u vrijednosti od više stotina hiljada eura i prijetili radnicima telekoma.

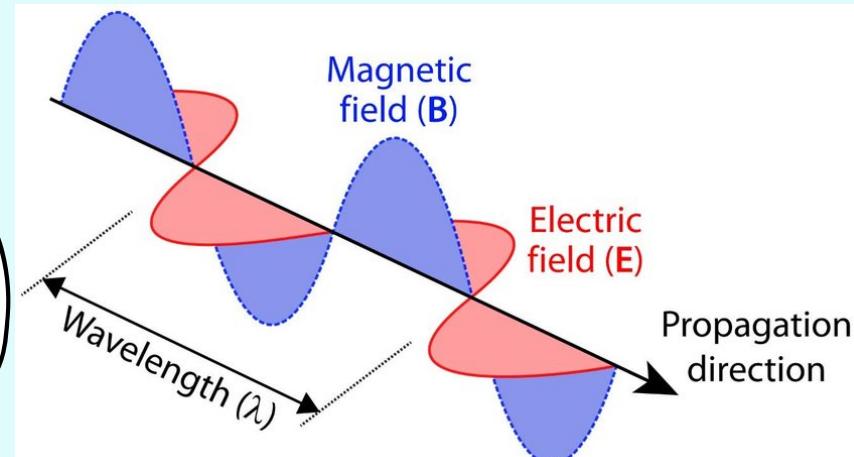

U nekim gradovima poput Birminghama, Engleska, zapaljena je antena koja čak nije ni pružala 5G usluge. Videozapisi o tim napadima postali su viralni na društvenim mrežama, što je dodatno ojačalo „anti-5G“ pokret.

Izgleda da je ova teorija zabrinula mnoge, zar ne? Međutim, analizirajući mnoge objave koje se dijele po društvenim mrežama, izgleda da mnogi zapravo ne razumiju šta je 5G tehnologija. Pa pogledajmo!

U suštini, radi se o novoj generaciji mobilnih mreža, tehnološkom napretku u odnosu na dosadašnje 4G, 3G ili 2G mreže. Obzirom da 5G mreža omogućava hiljadu puta brži prenos podataka od 4G mreže može se reći da je to njena glavna karakteristika.

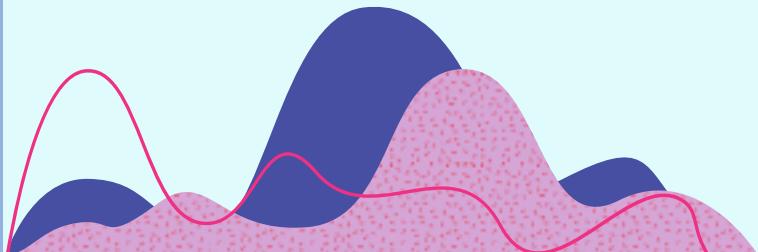

Sve bežične komunikacije, uključujući 5G, koriste elektromagnetski talas („signal“) kao sredstvo prijenosa informacija. Elektromagnetski talasi su svi talasi čije se širenje odvija titranjem električnog i magnetnog polja, tj. promjenom električnog i magnetnog polja nastaju elektromagnetski talasi. Dakle, elektromagnetski talas za širenje u prostoru ne treba medij (neko sredstvo ili tvar) i elektromagnetskim talasom se prenosi snaga (energija), a ne materija.

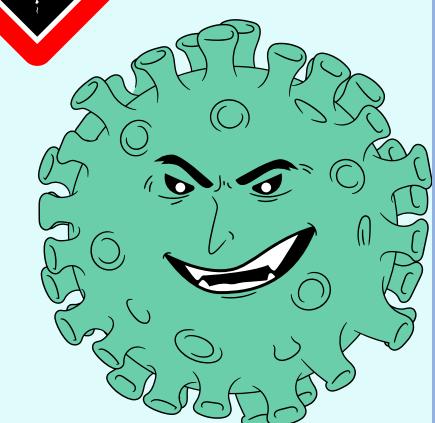

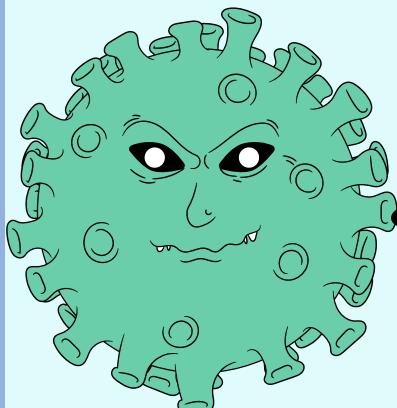

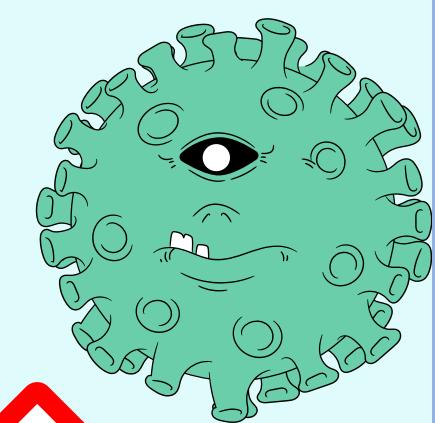

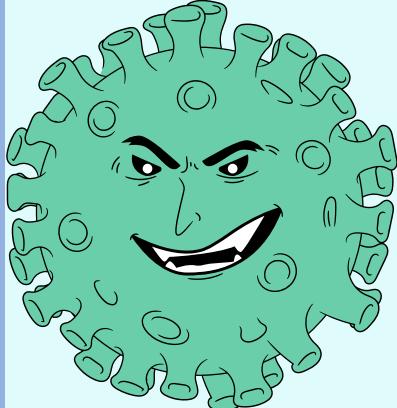

Skladno potrebama i oblicima informacija radi se „oblikovanje“ signala kako bi bio najpogodniji za prijenos. Osim oblika, govorimo da signal ima neku razinu, prijenosnu frekvenciju, odnosno širinu kanala:

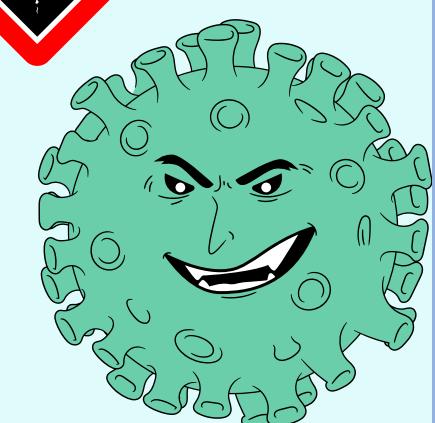

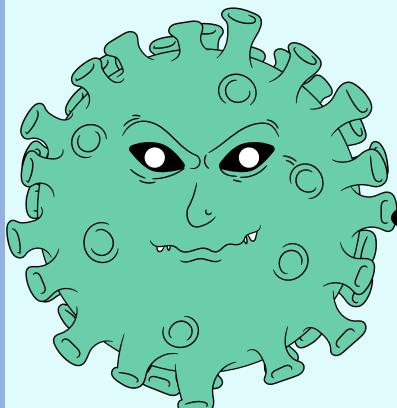

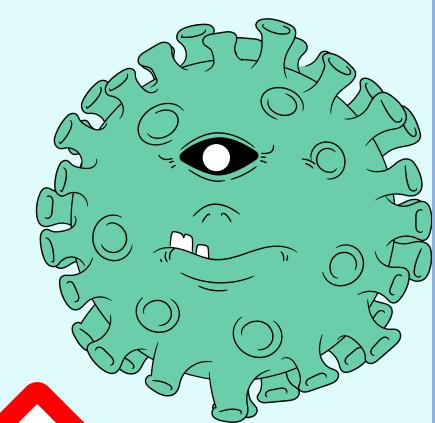

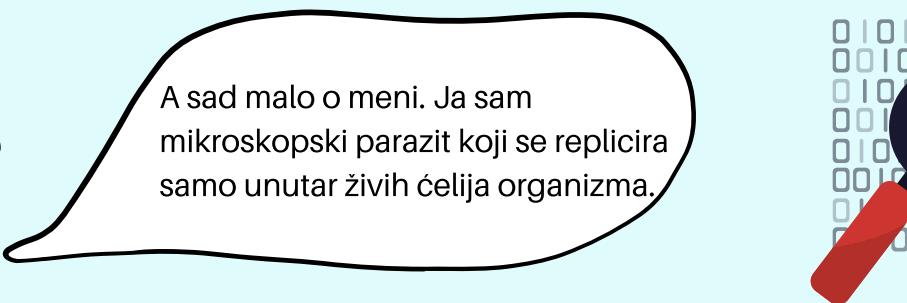

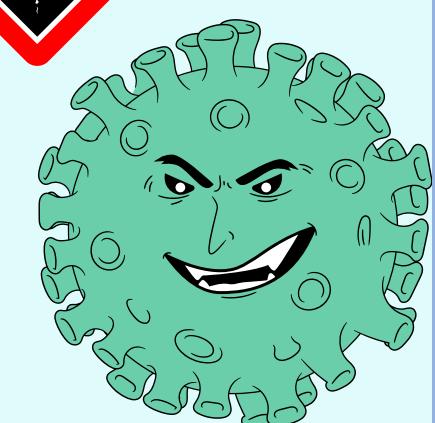

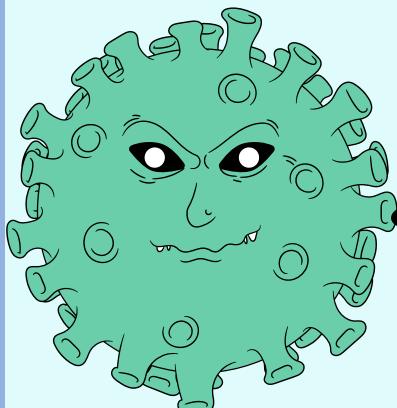

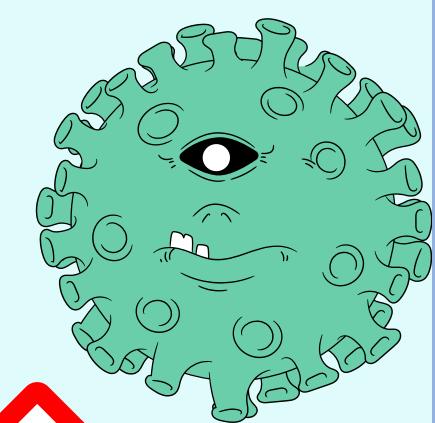

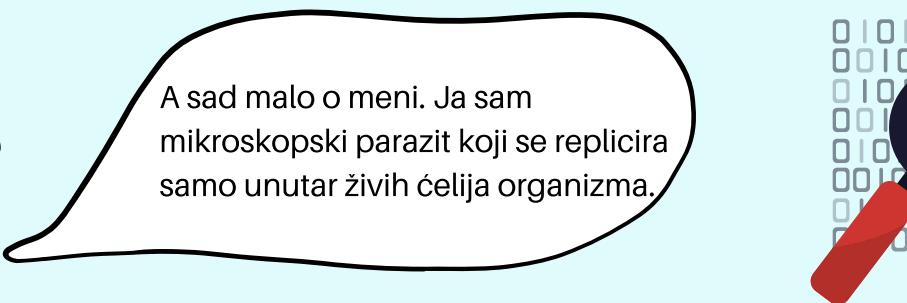

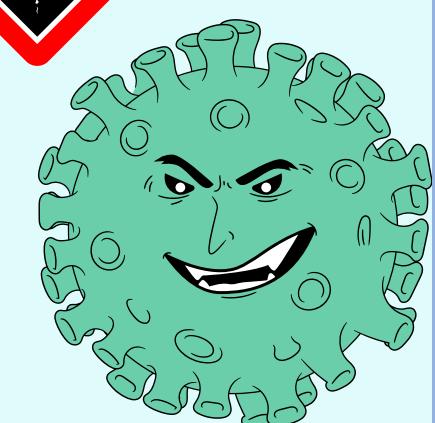

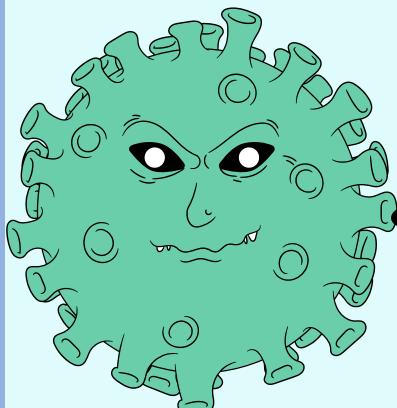

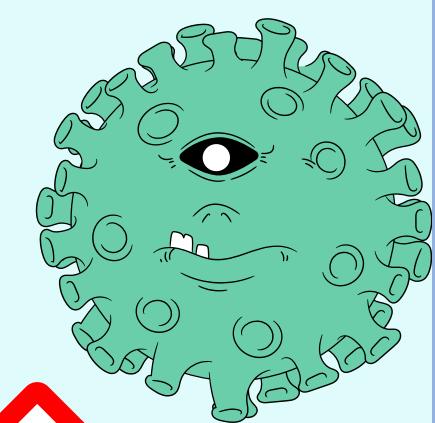

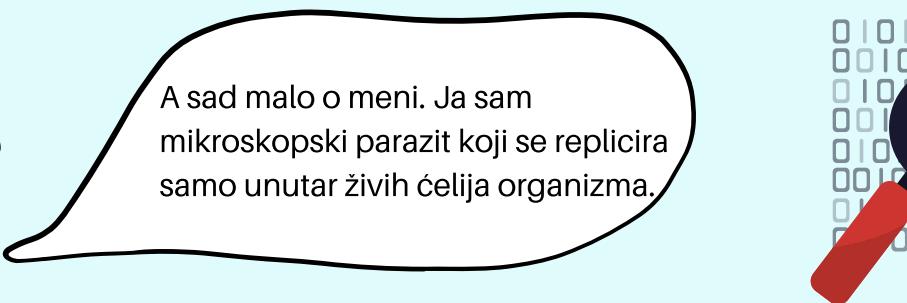

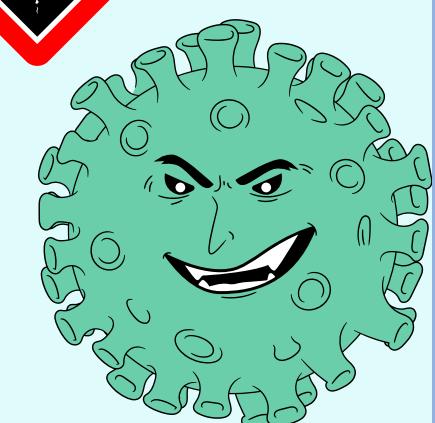

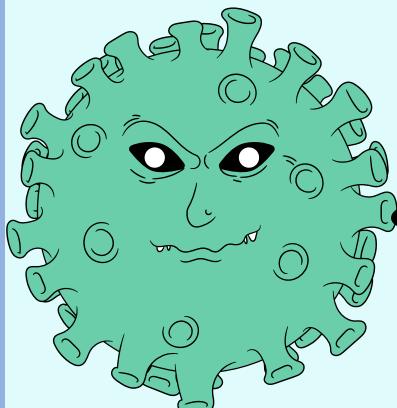

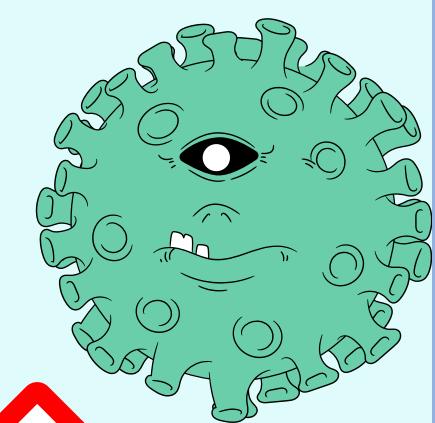

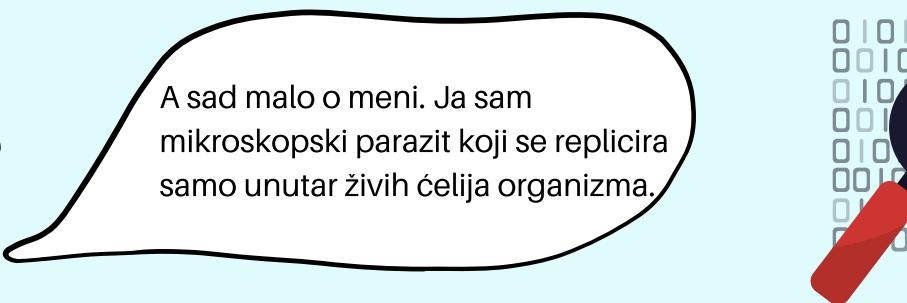

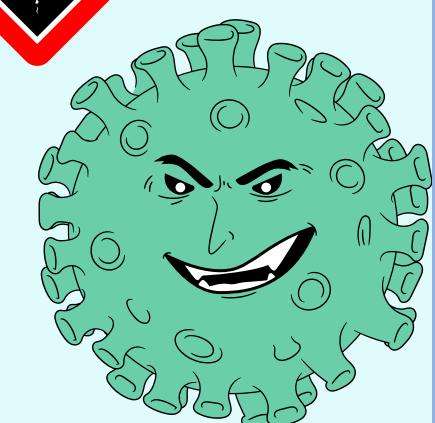

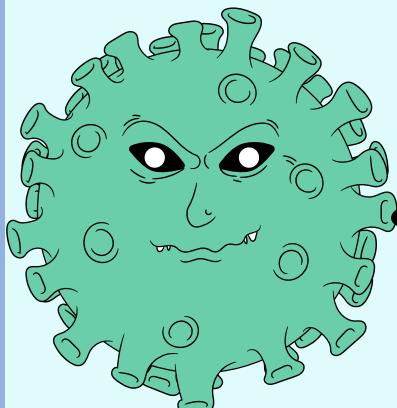

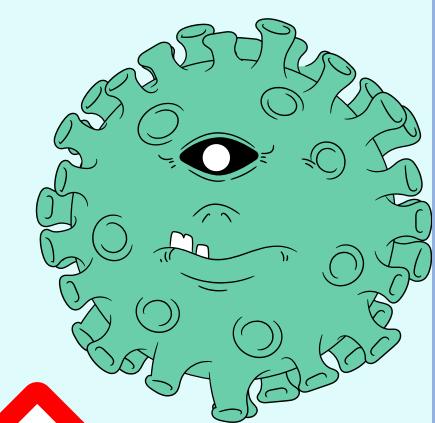

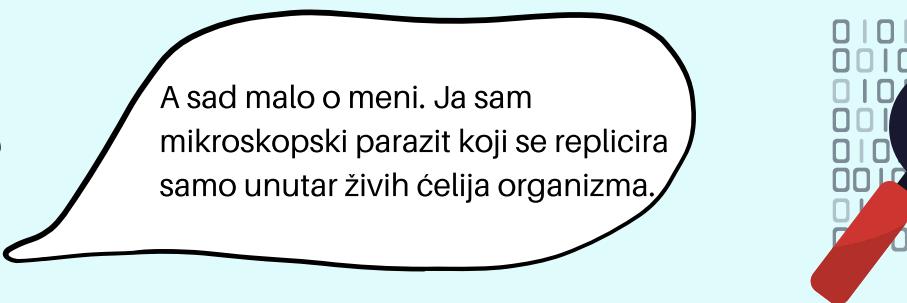

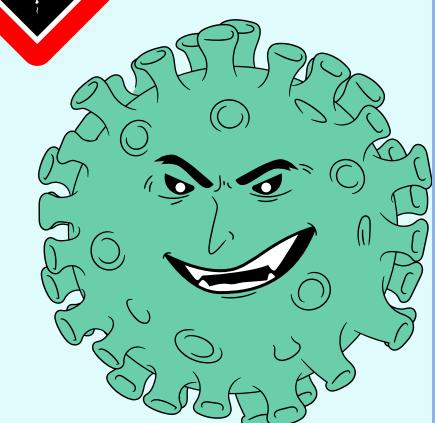

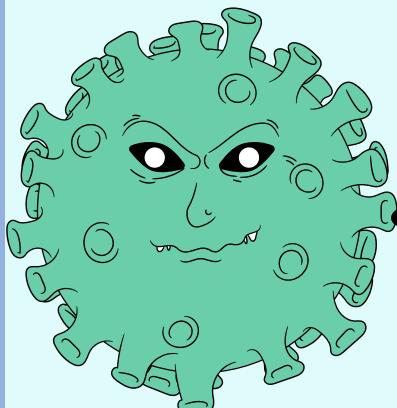

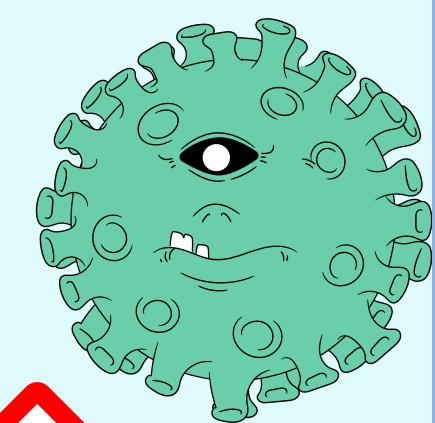

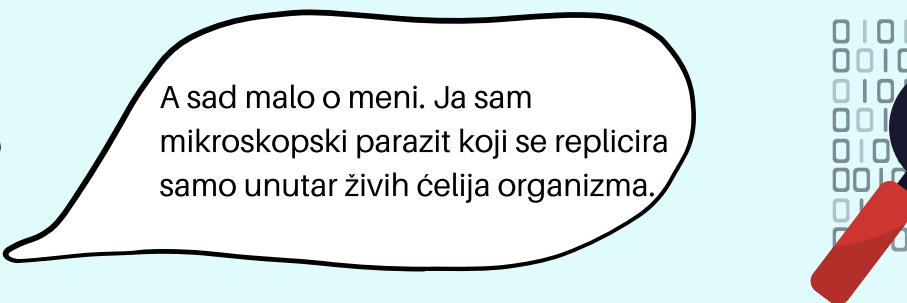

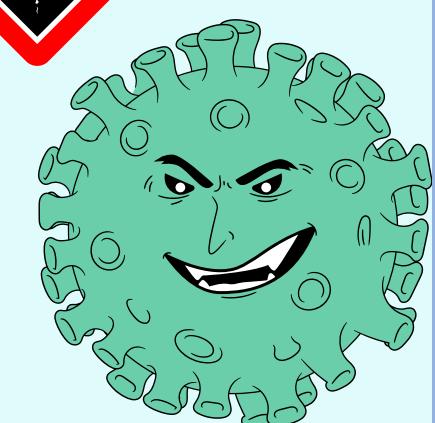

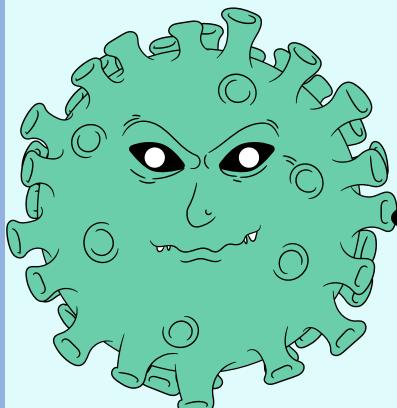

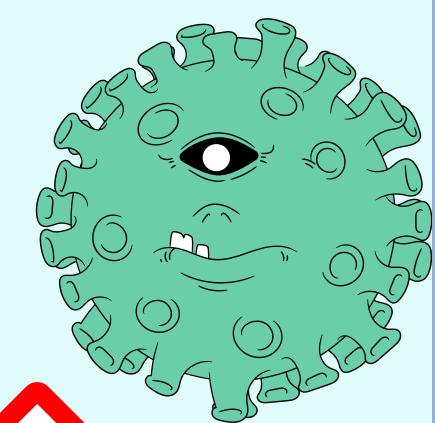

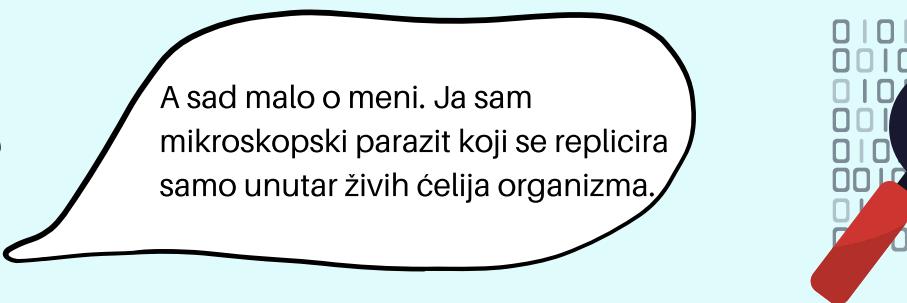

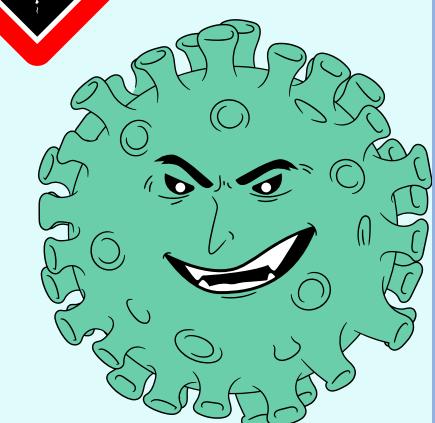

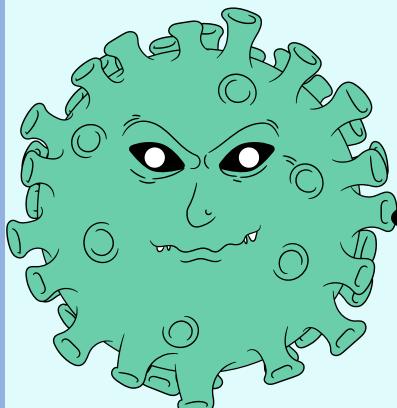

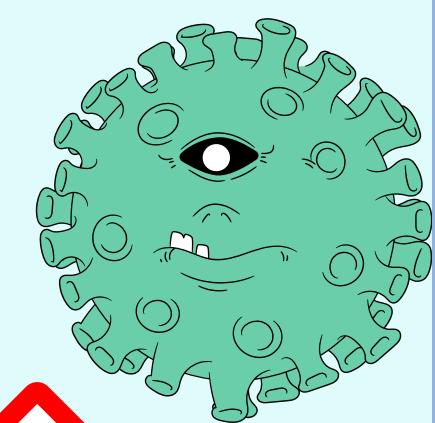

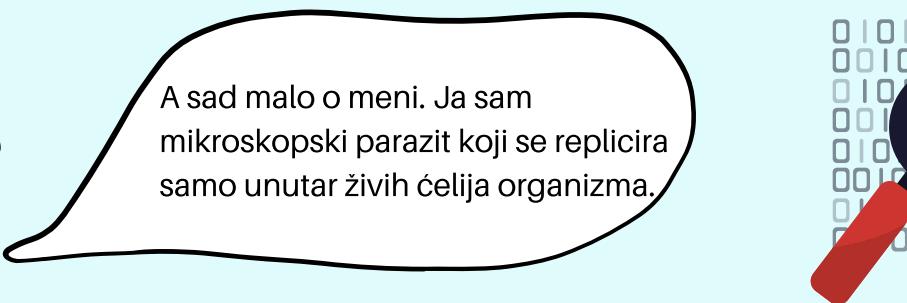

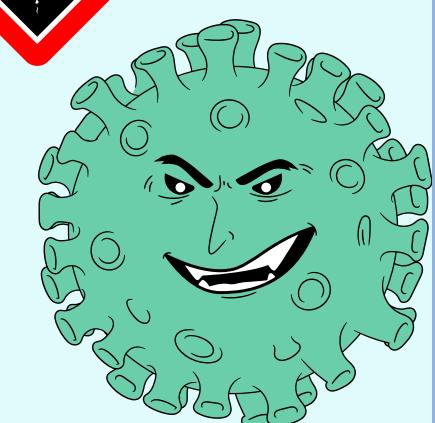

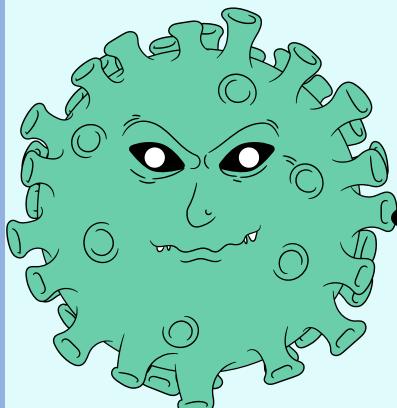

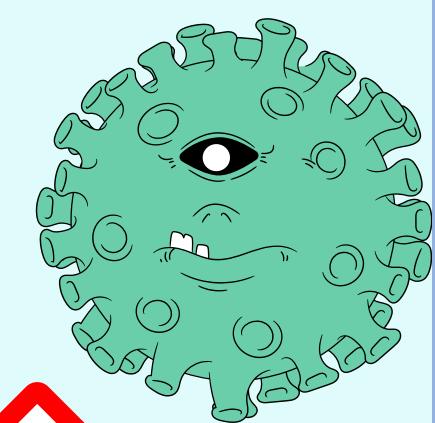

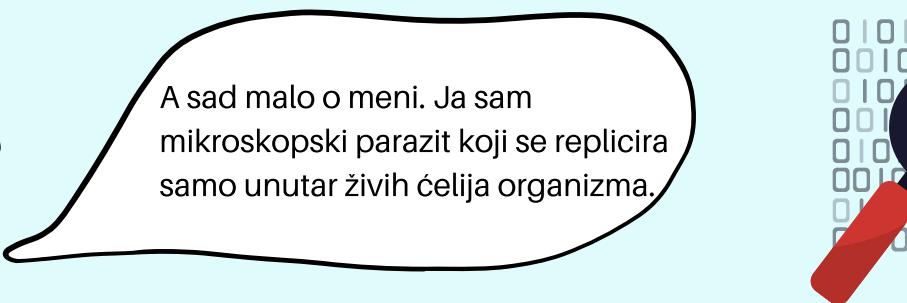

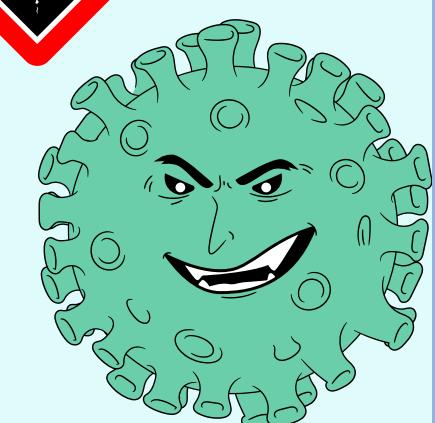

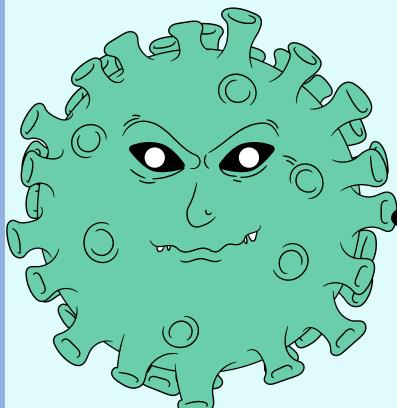

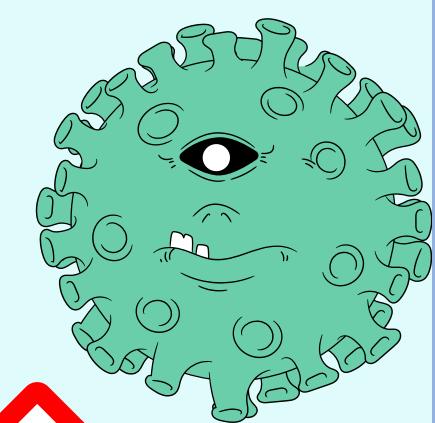

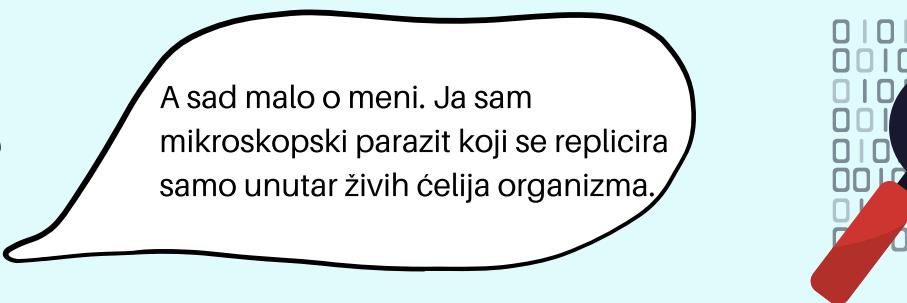

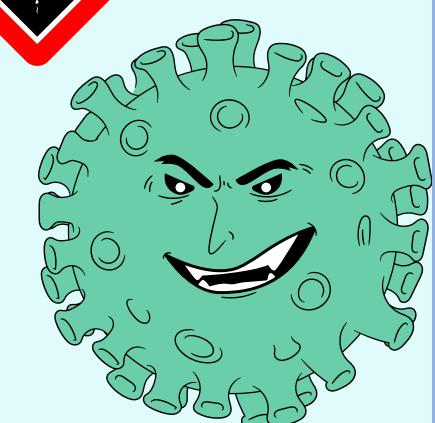

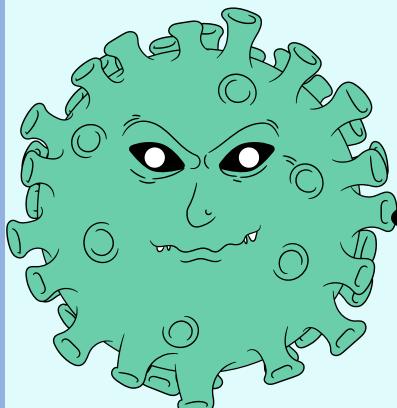

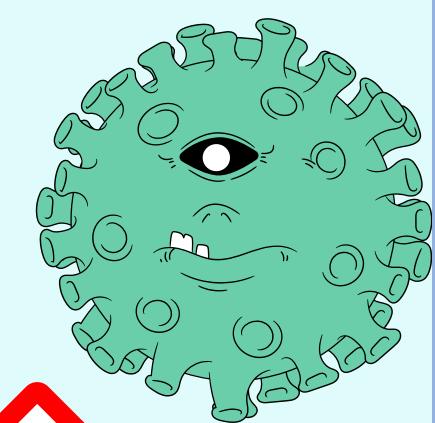

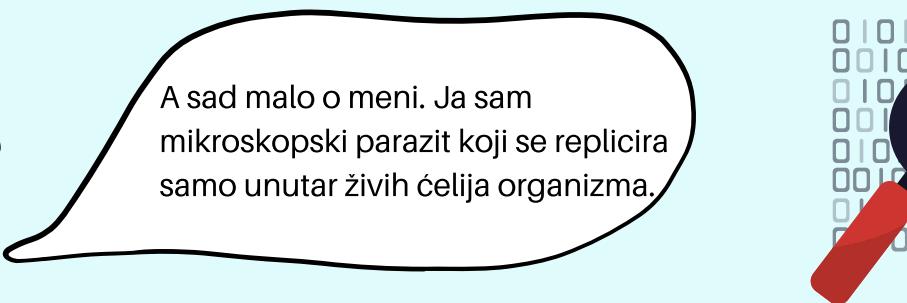

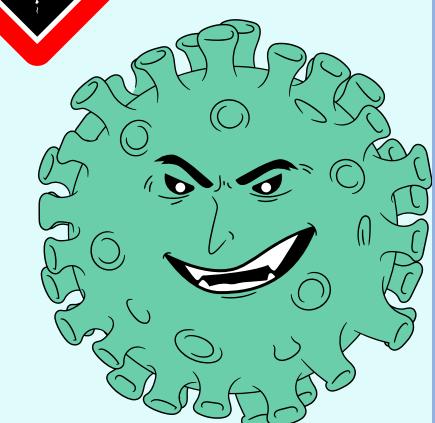

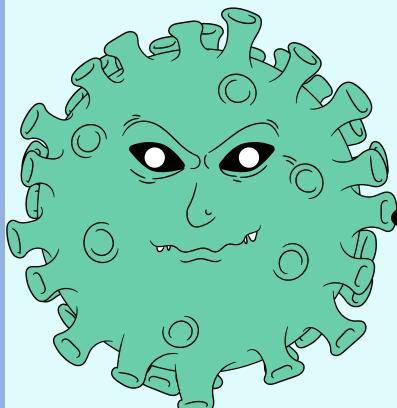

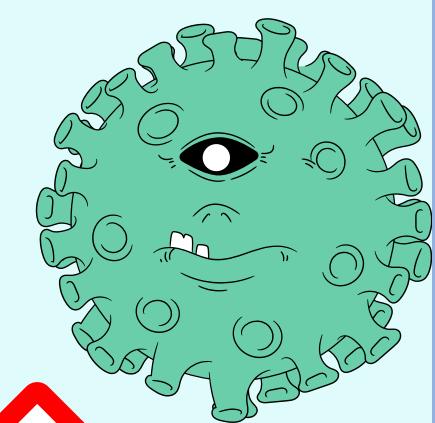

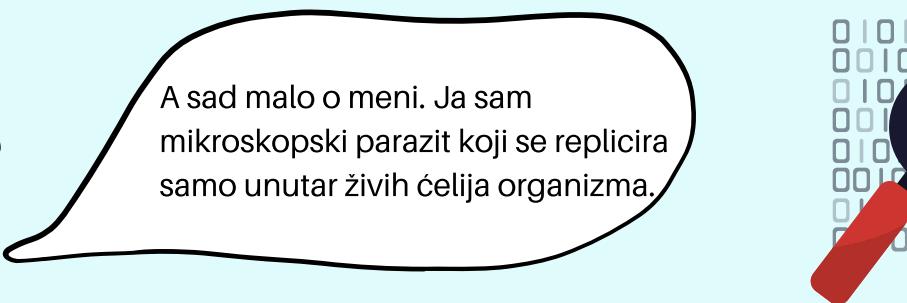

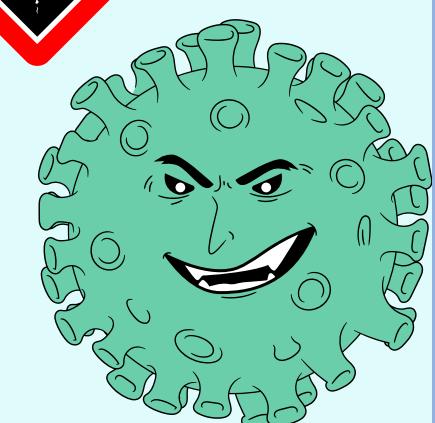

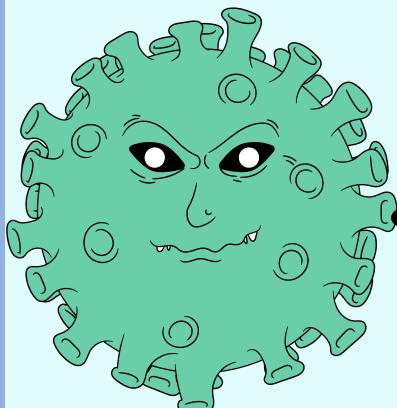

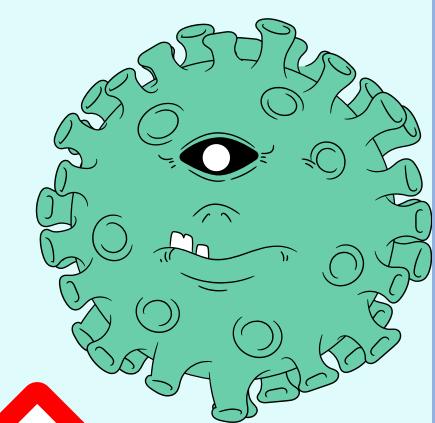

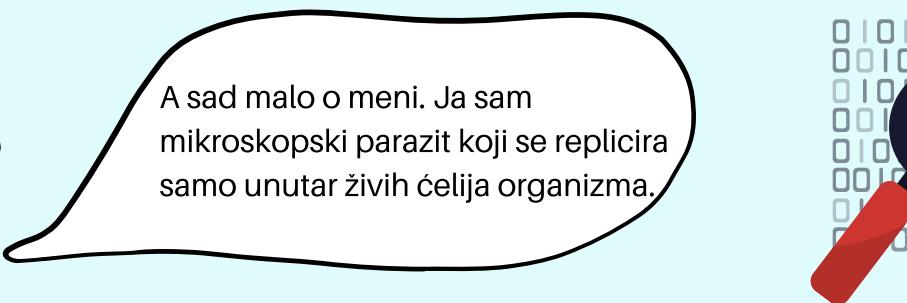

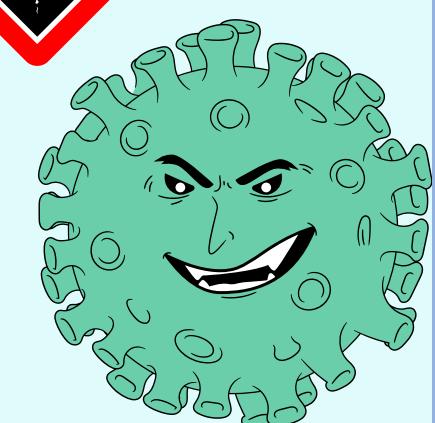

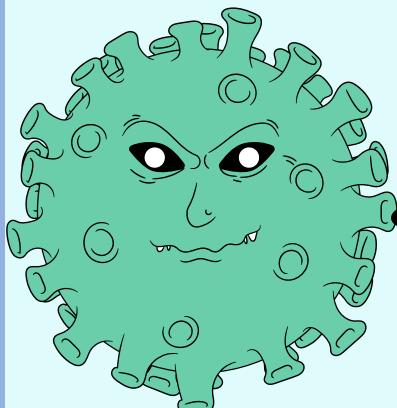

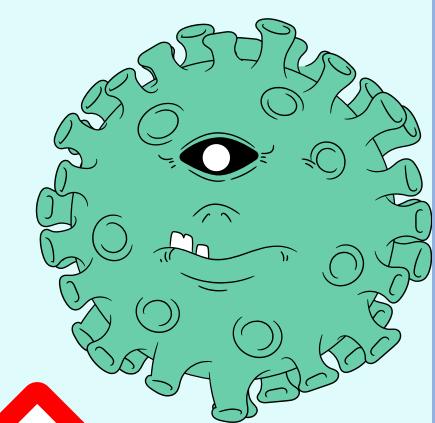

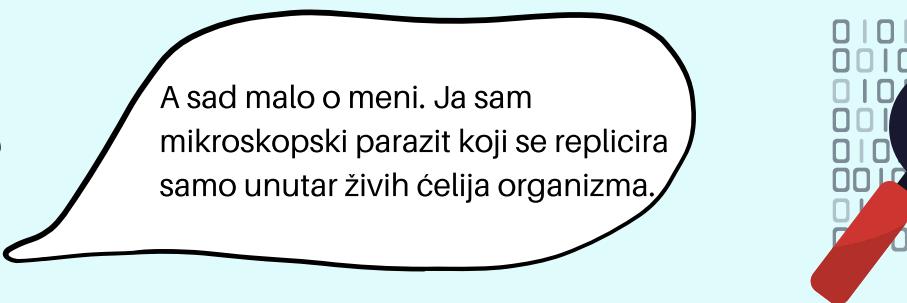

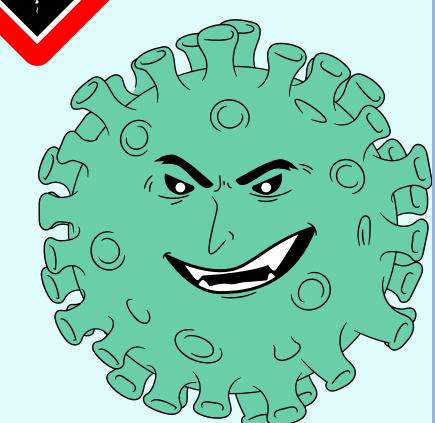

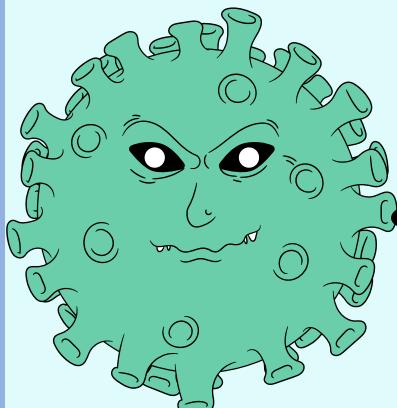

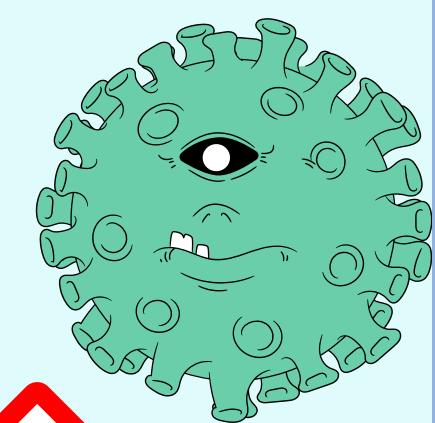

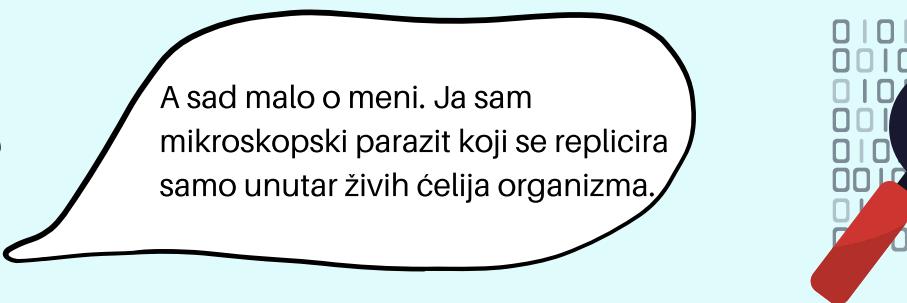

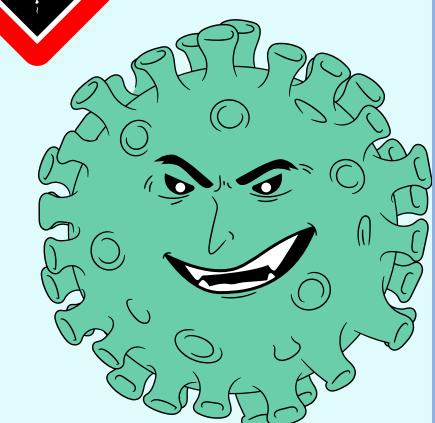

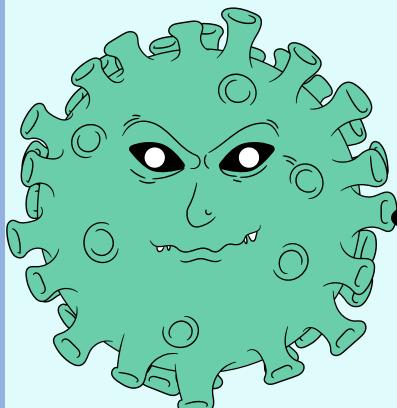

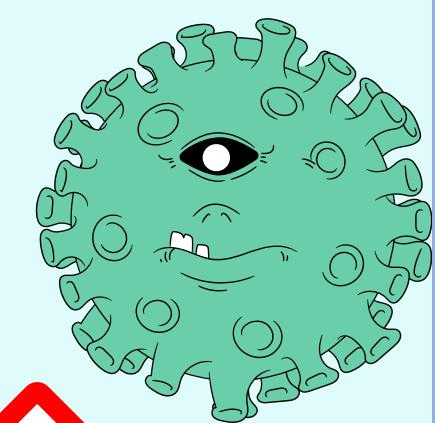

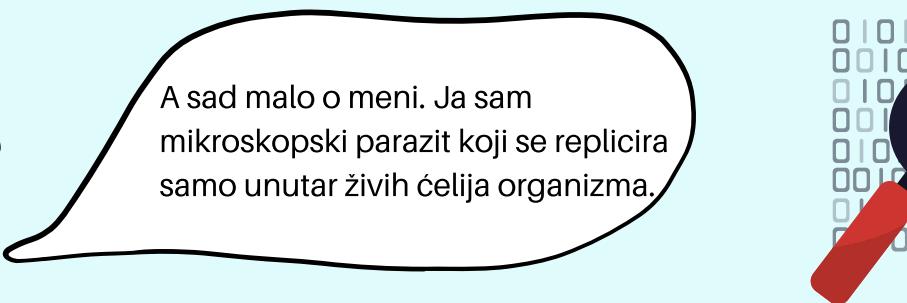

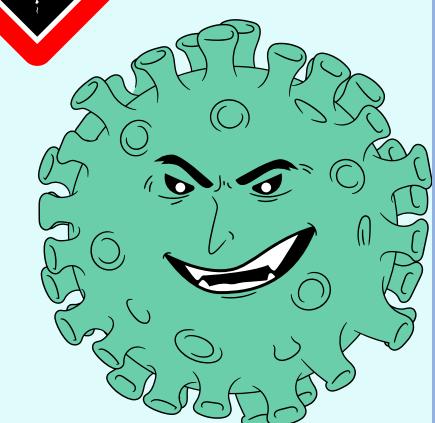

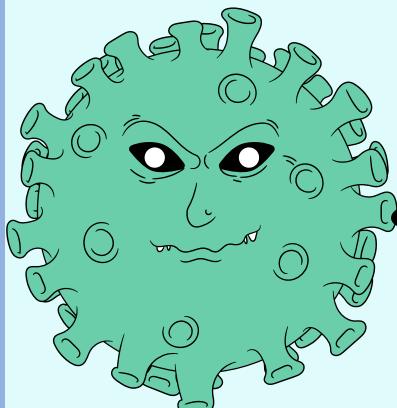

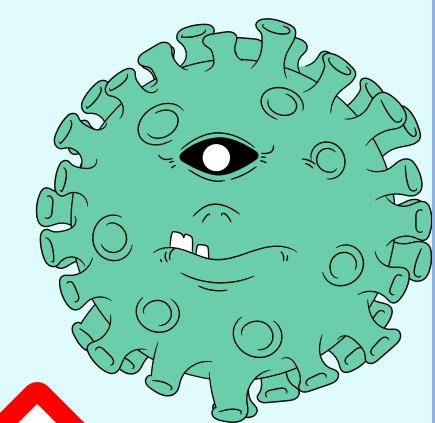

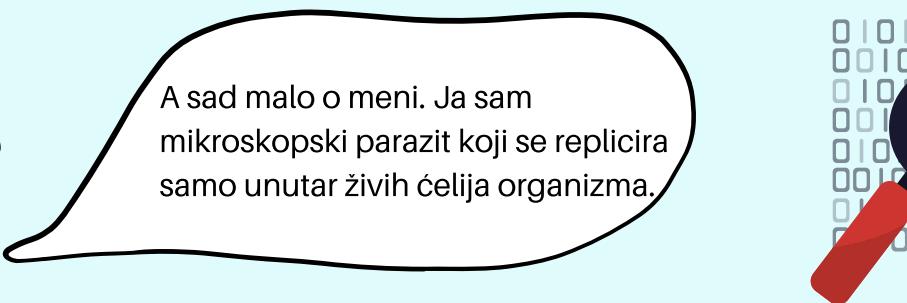

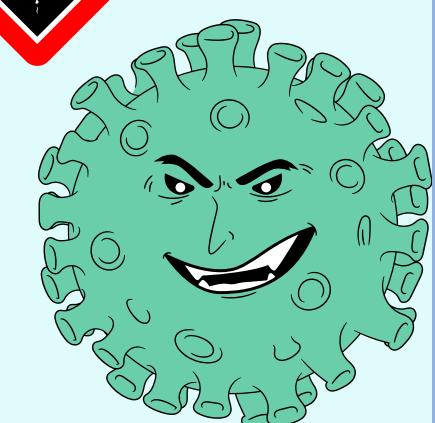

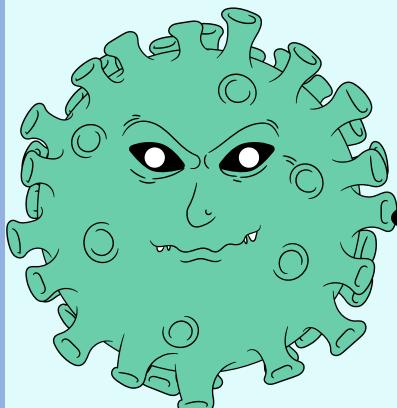

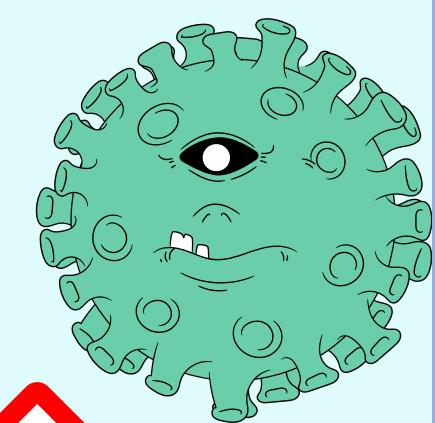

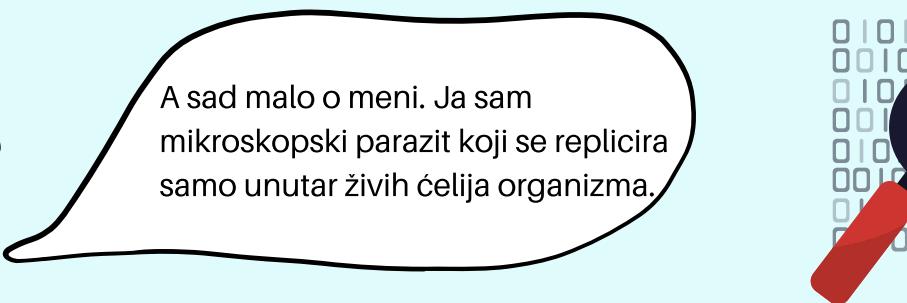

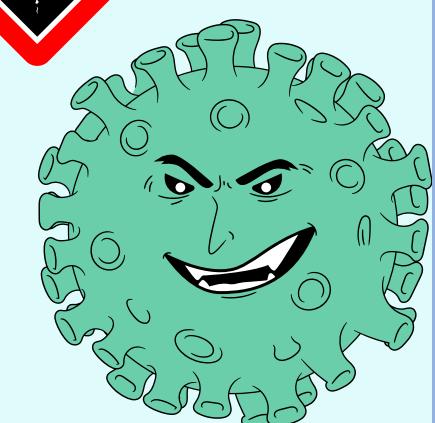

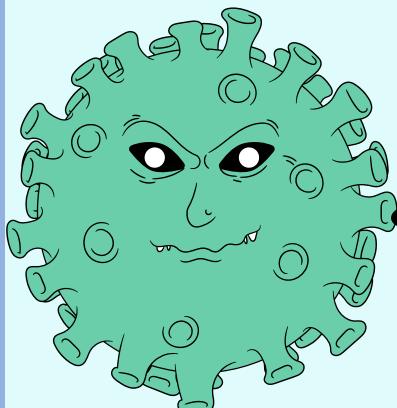

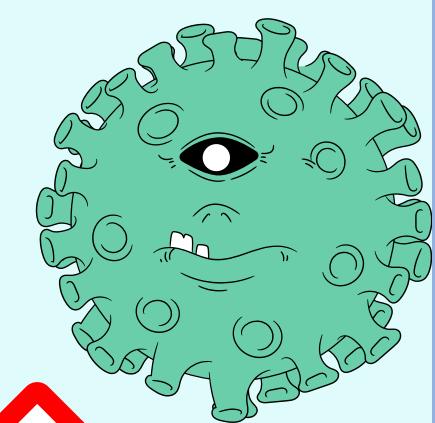

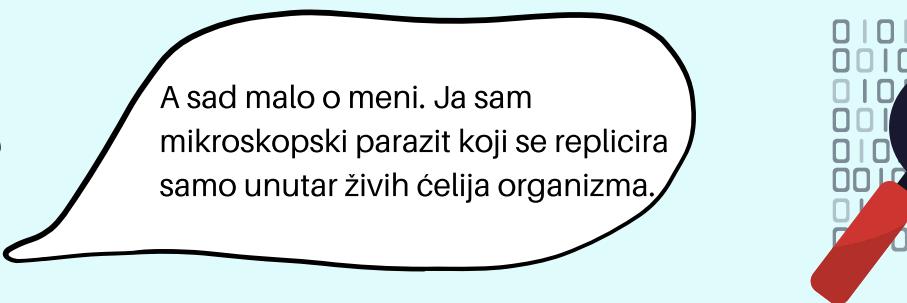

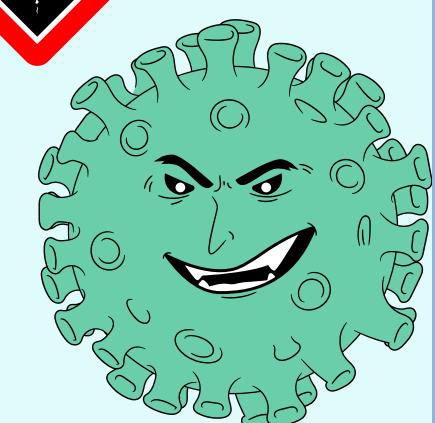

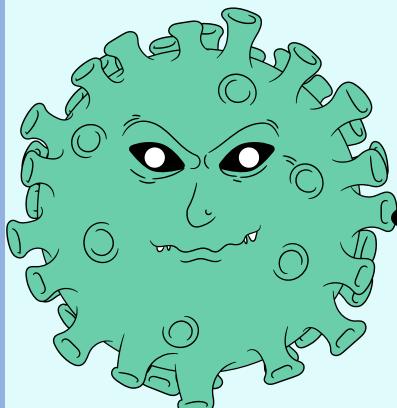

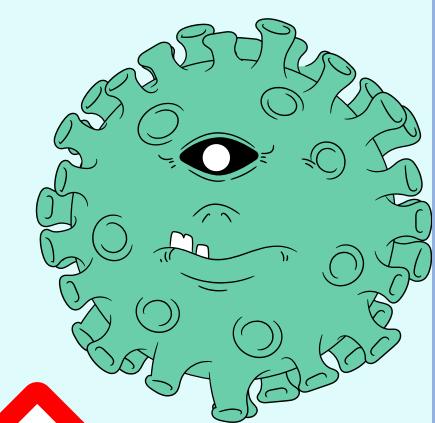

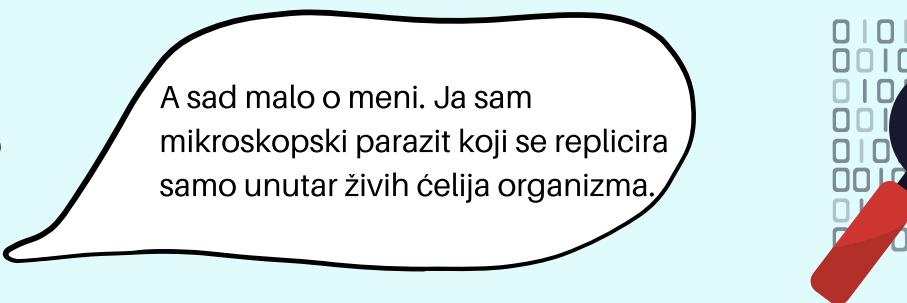

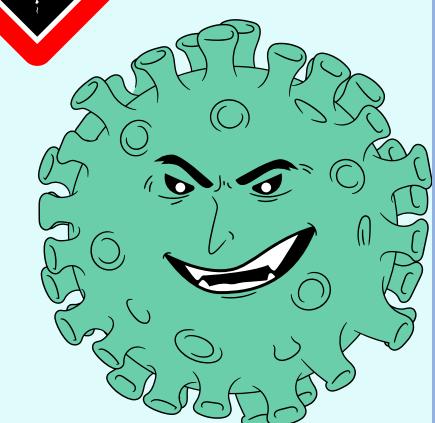

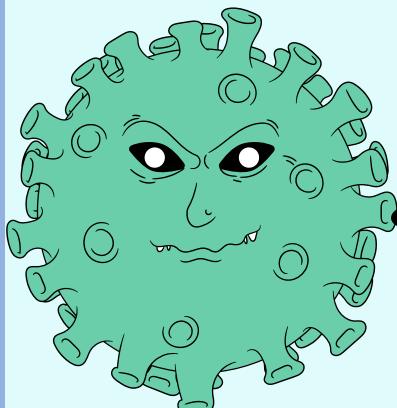

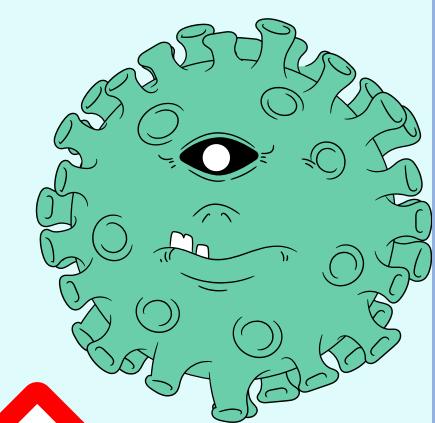

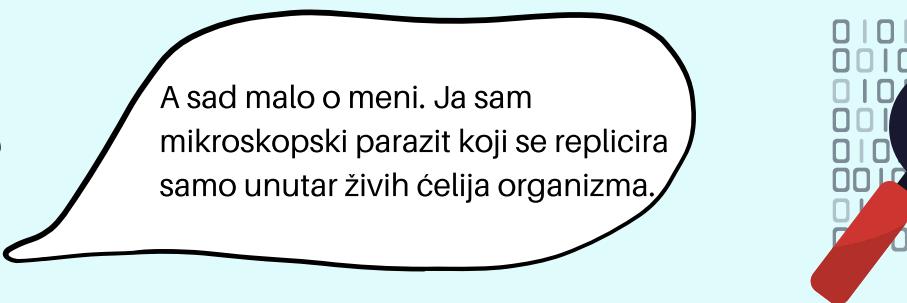

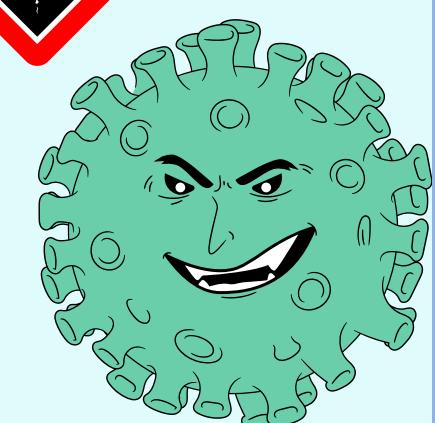

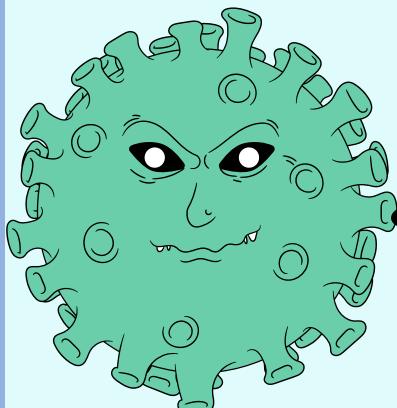

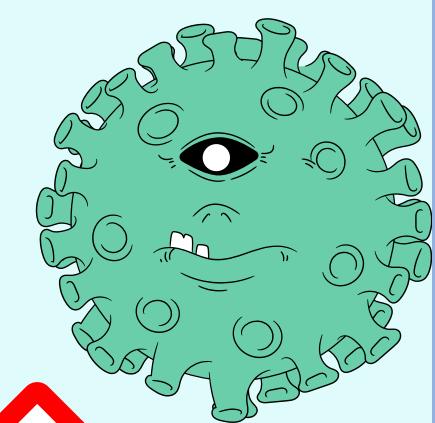

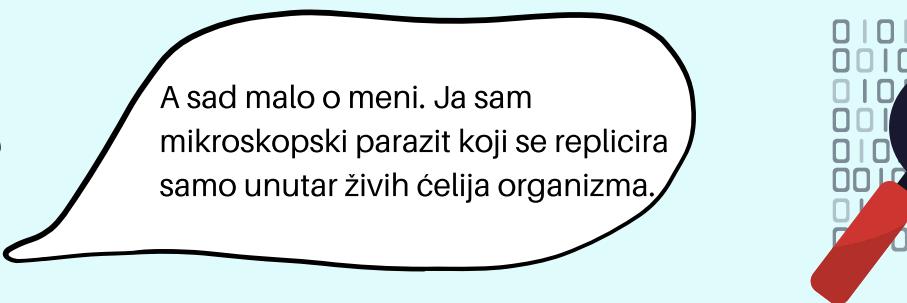

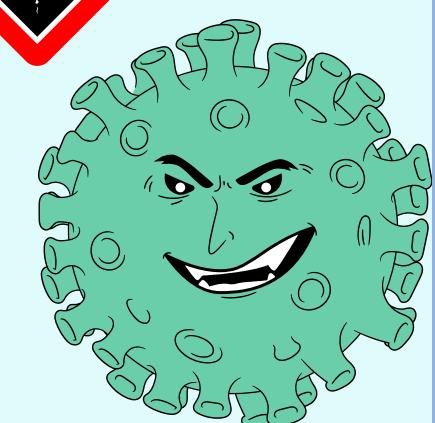

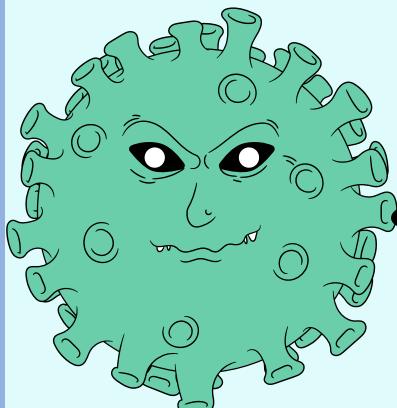

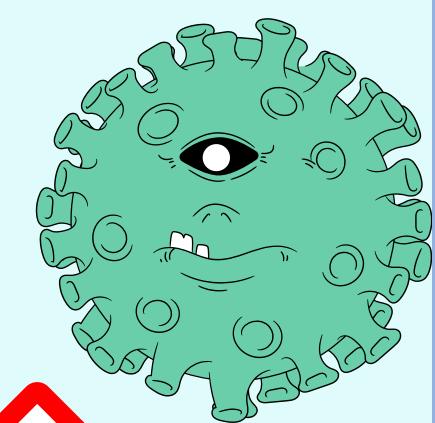

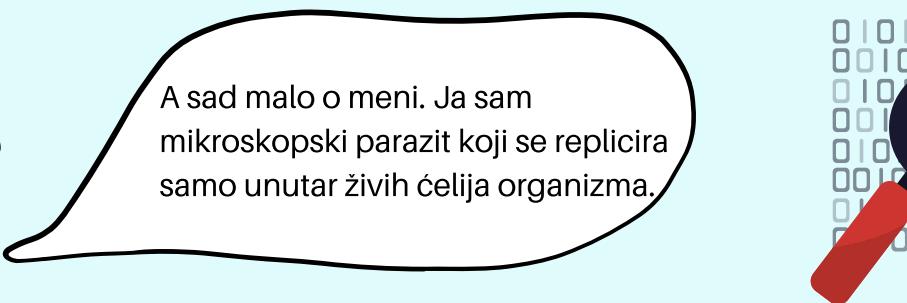

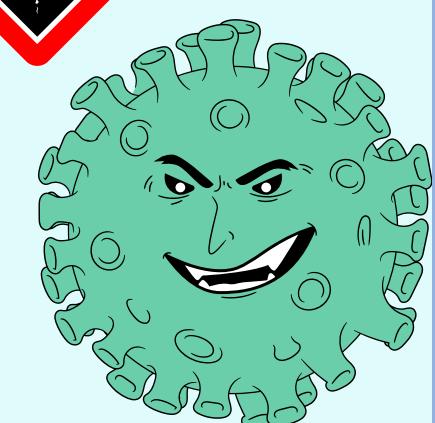

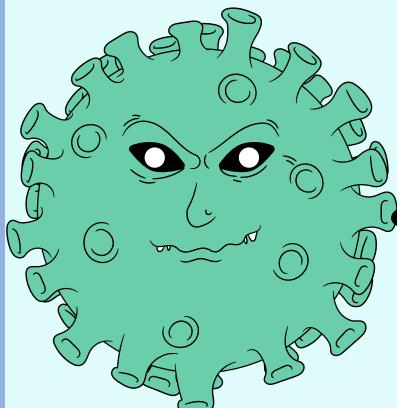

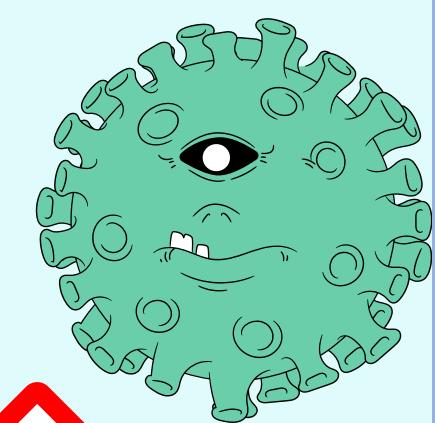

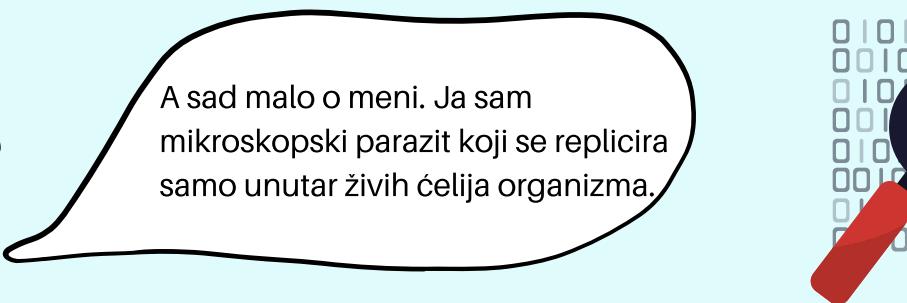

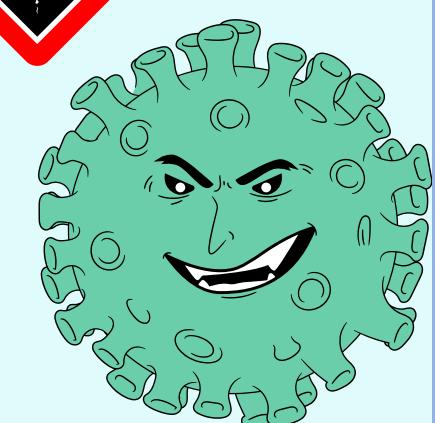

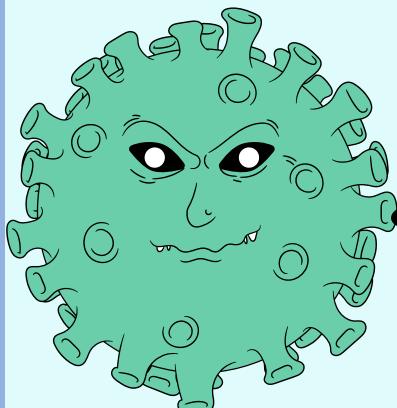

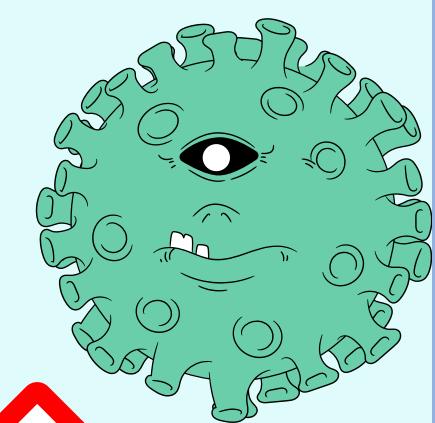

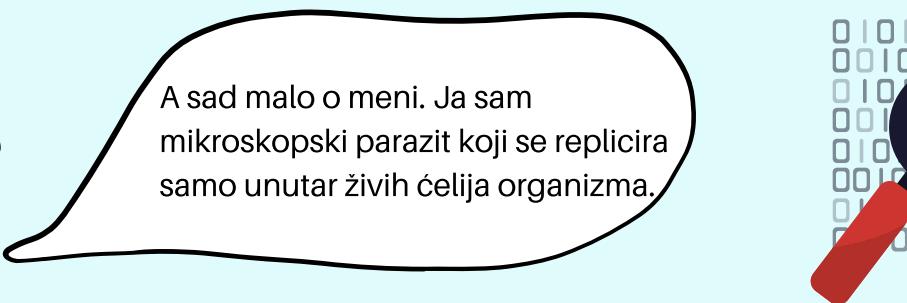

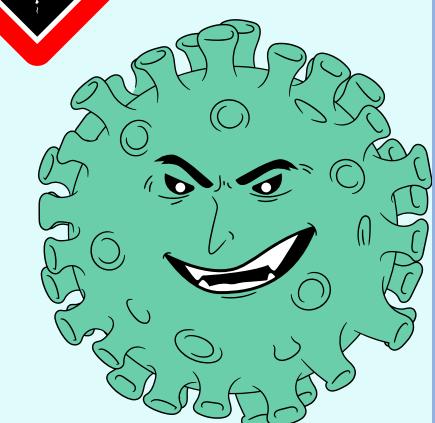

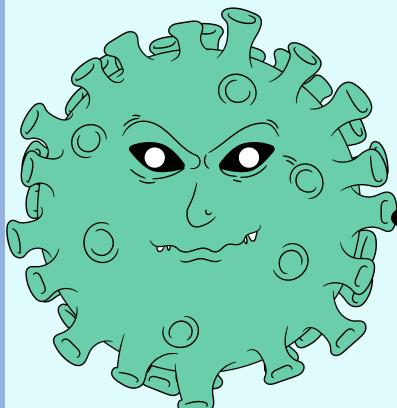

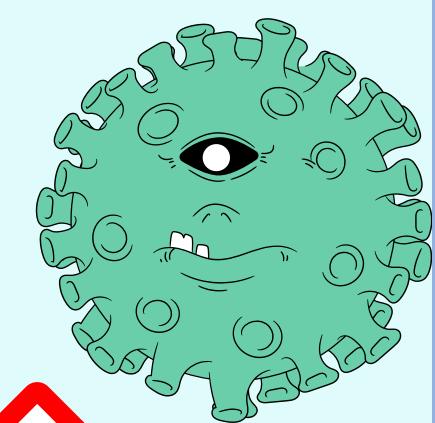

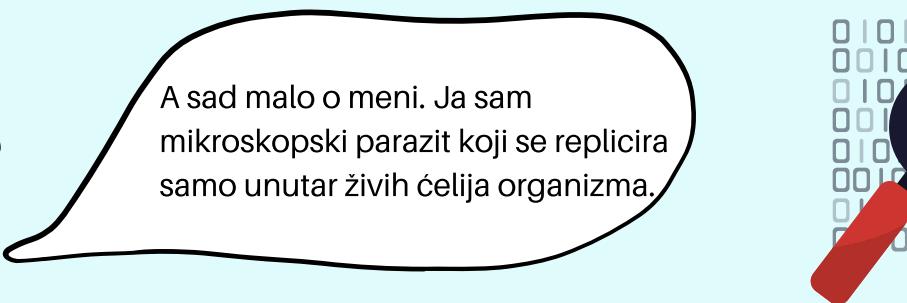

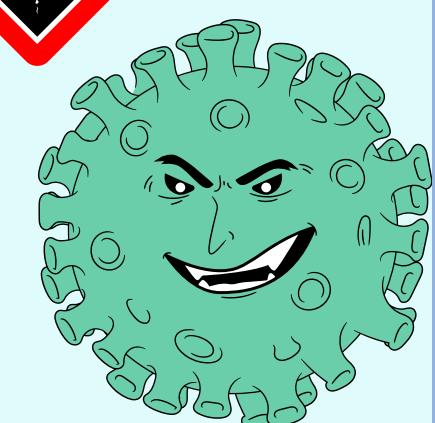

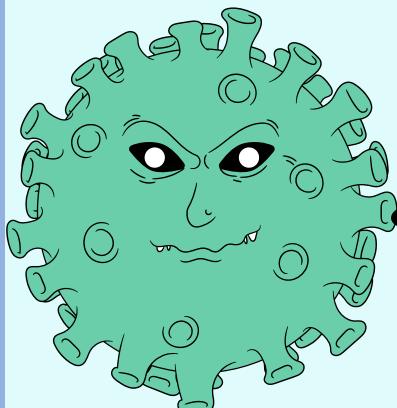

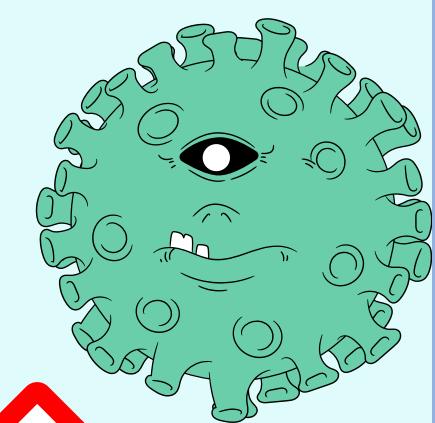

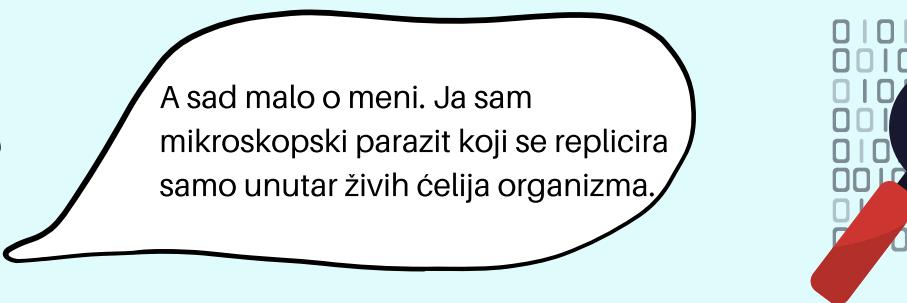

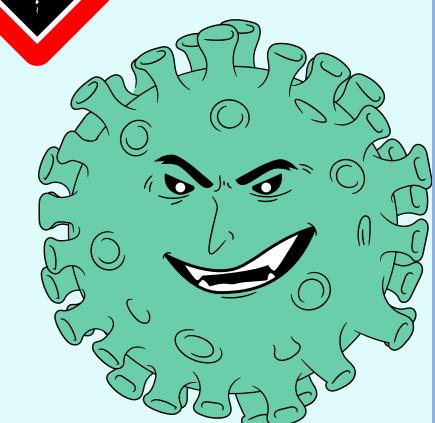

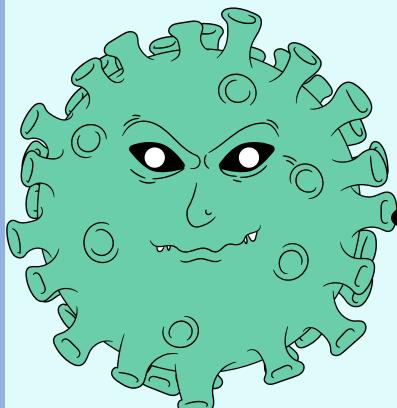

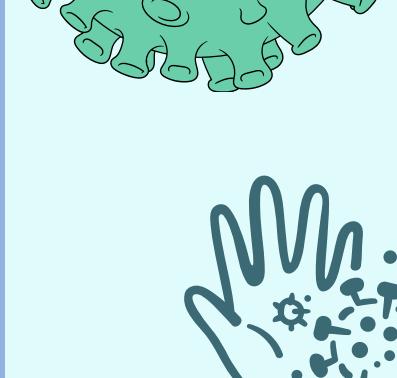

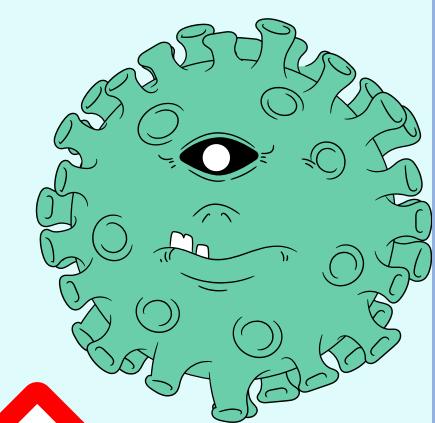

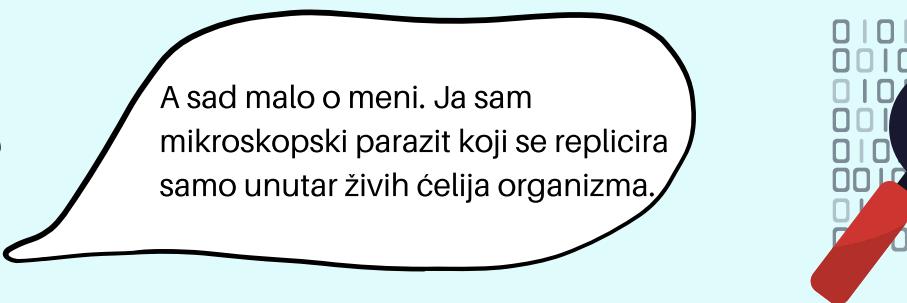

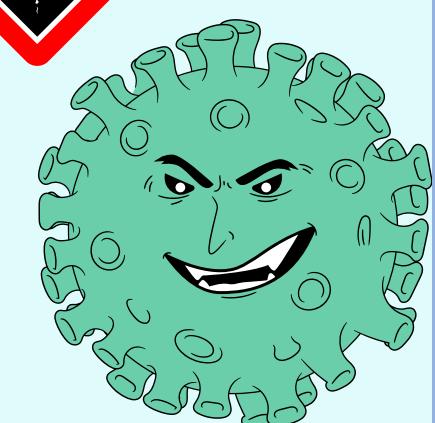

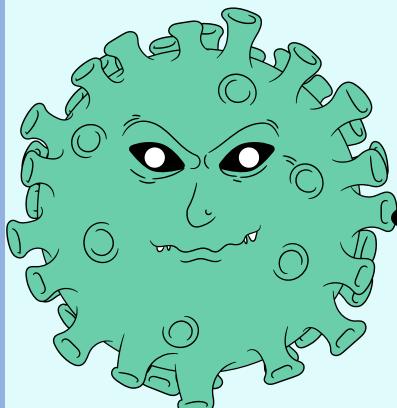

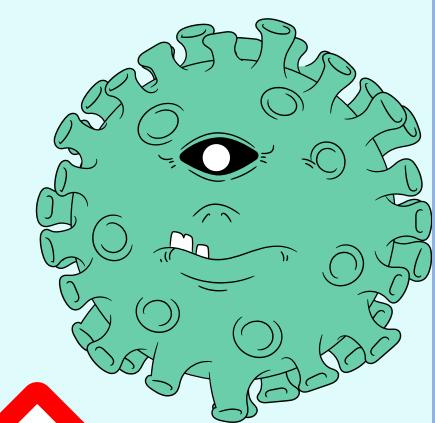

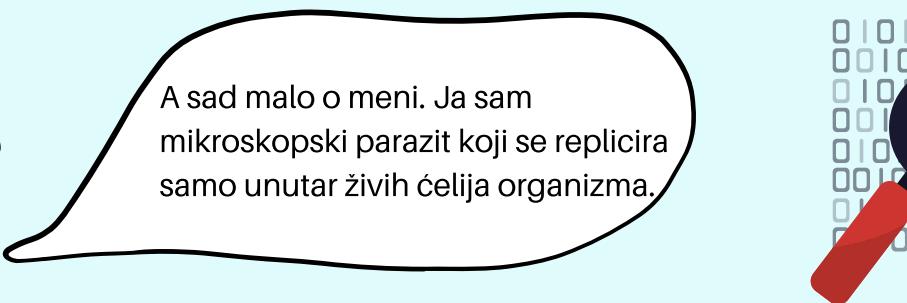

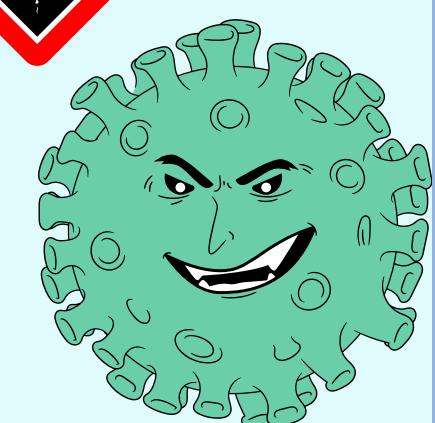

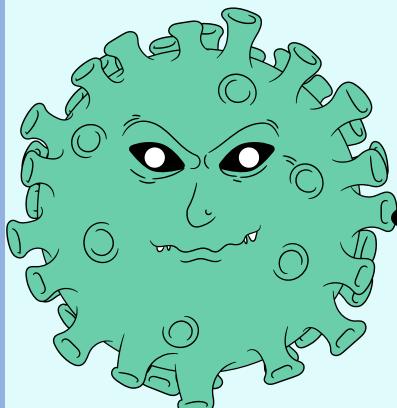

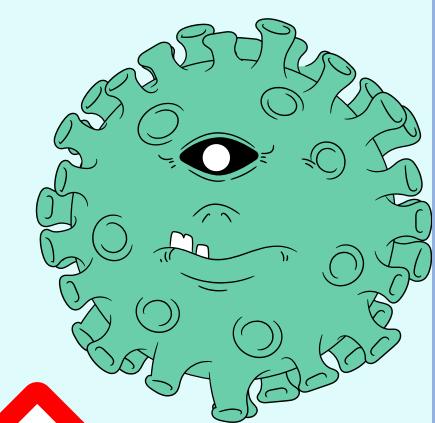

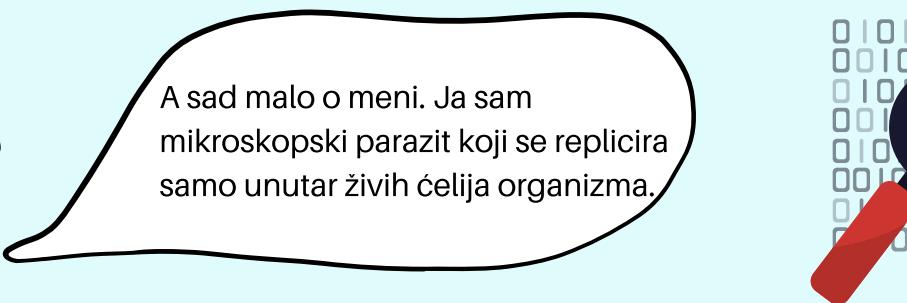

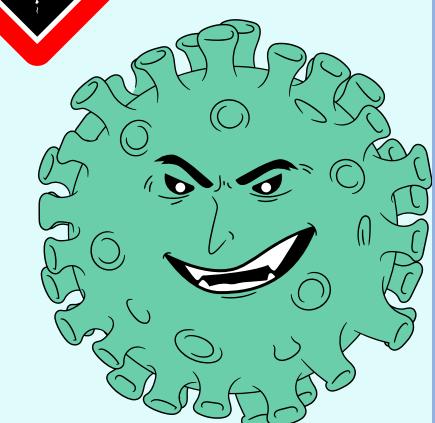

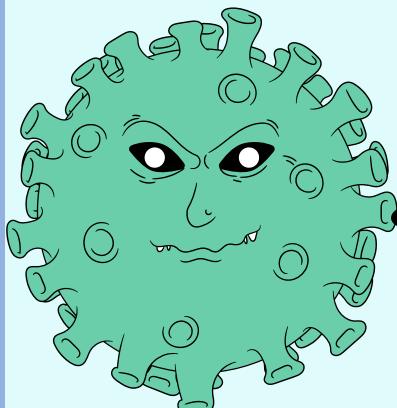

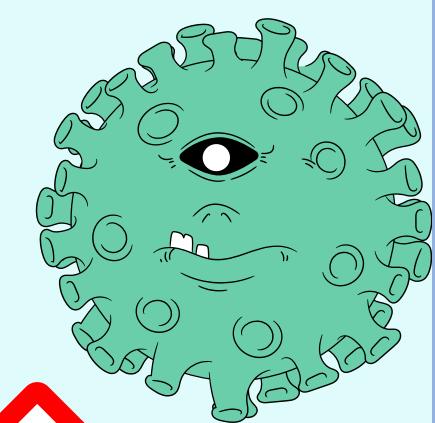

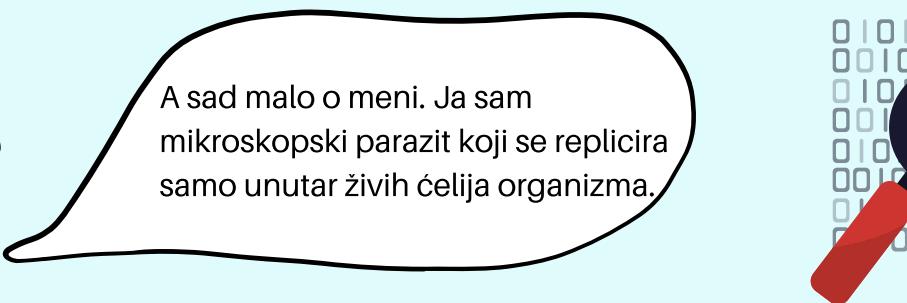

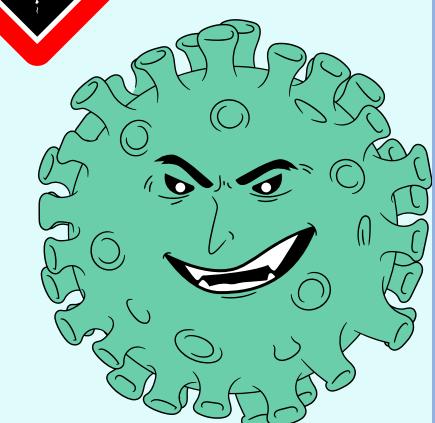

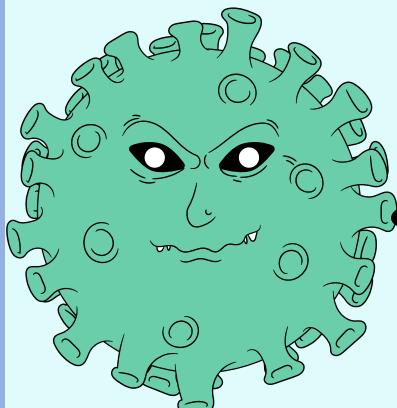

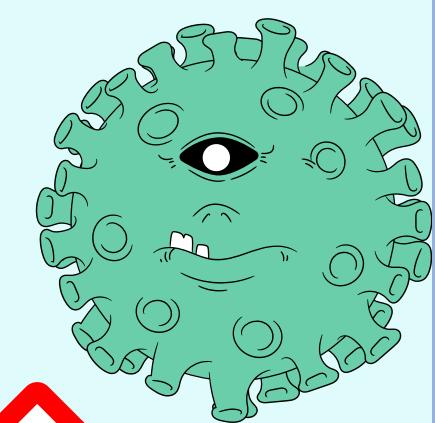

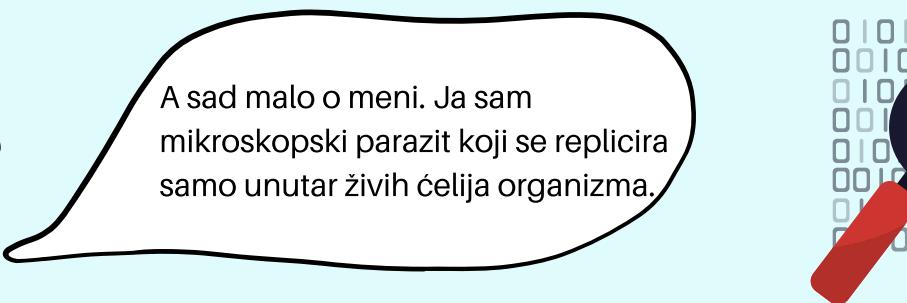

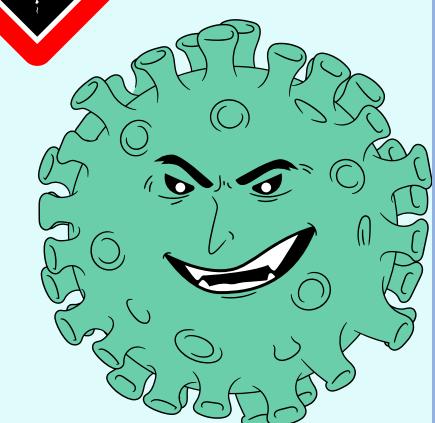

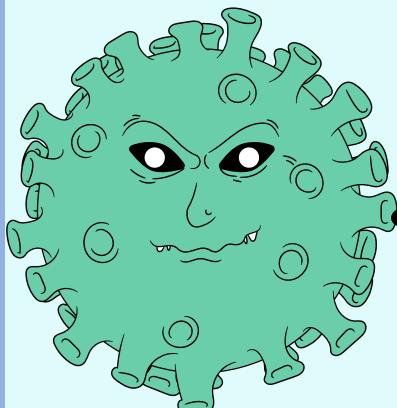

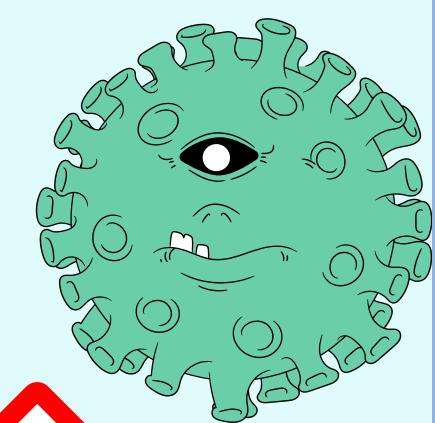

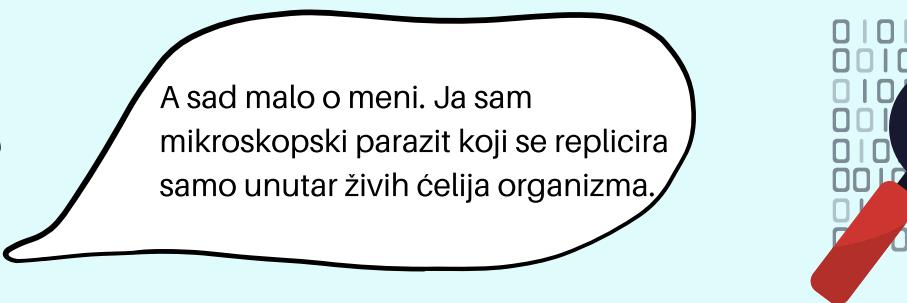

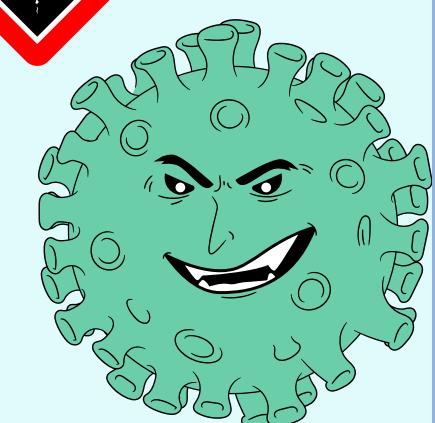

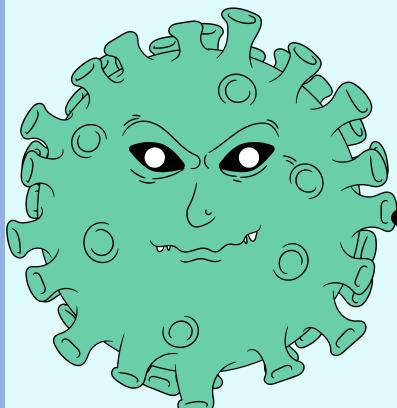

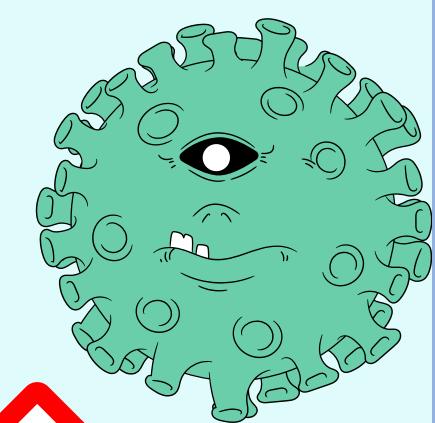

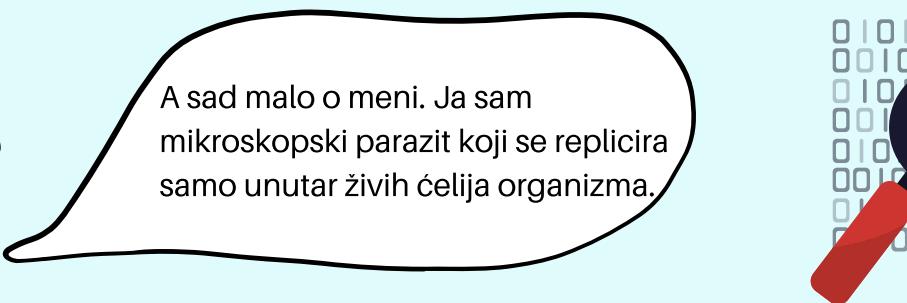

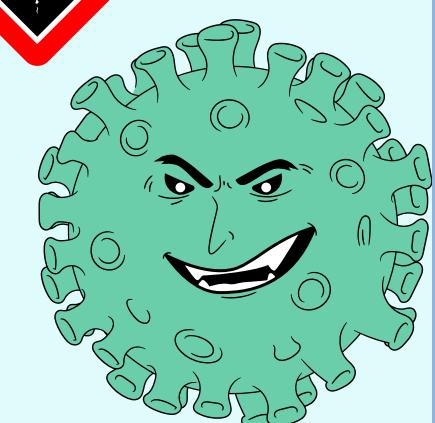

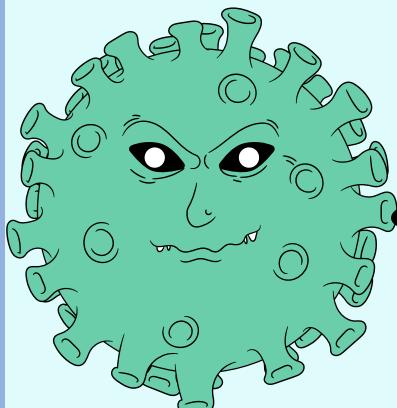

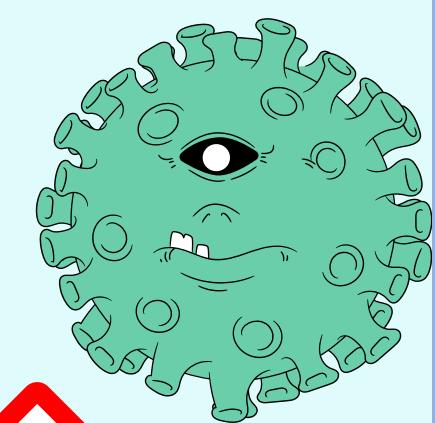

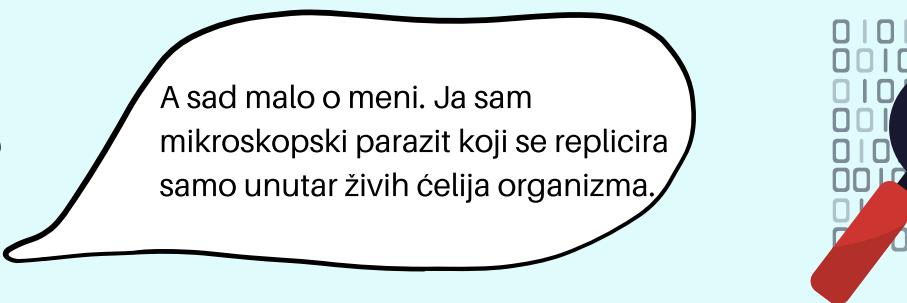

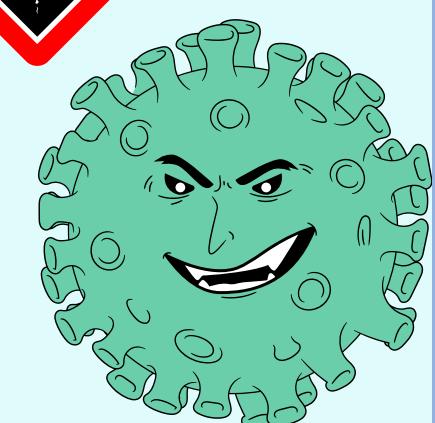

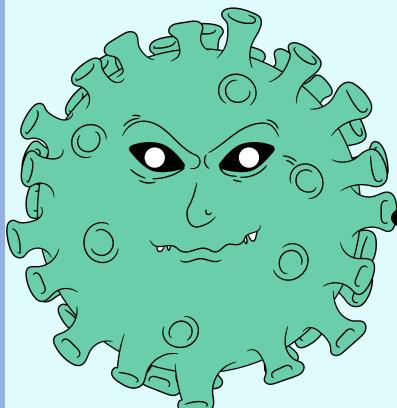

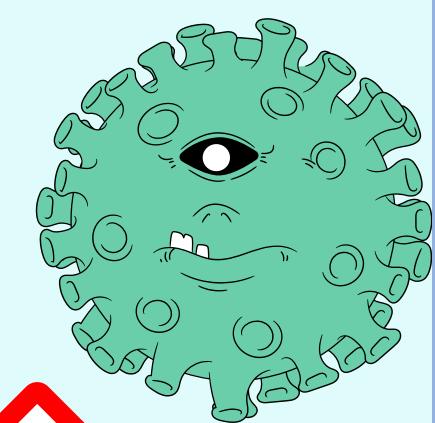

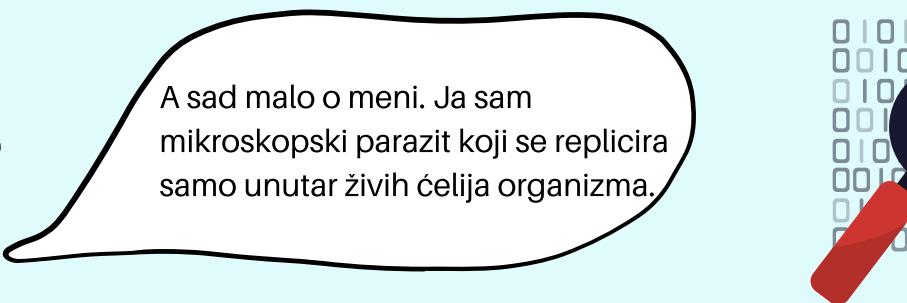

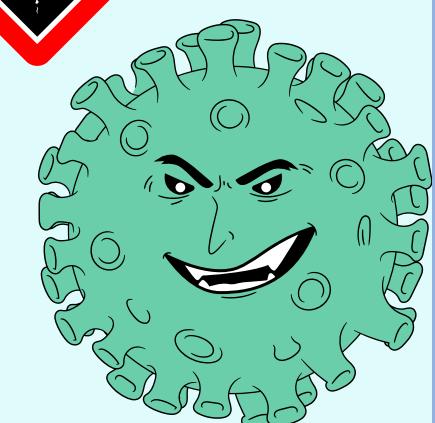

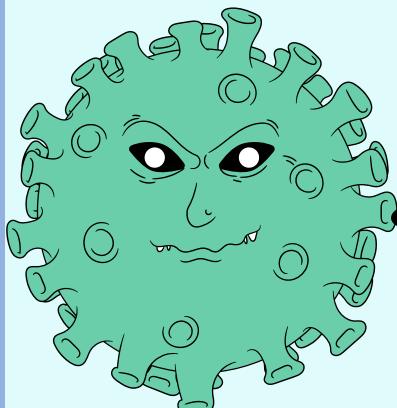

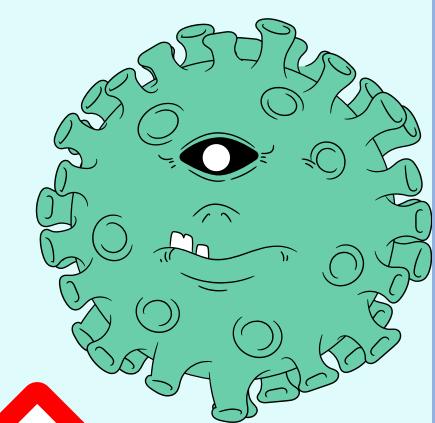

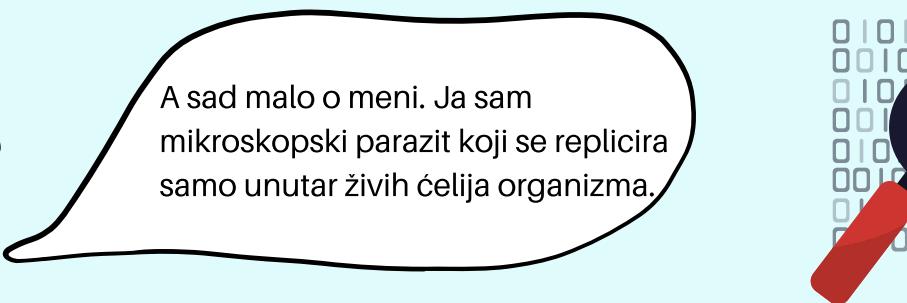

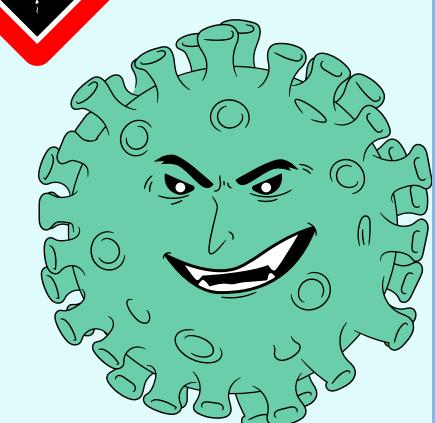

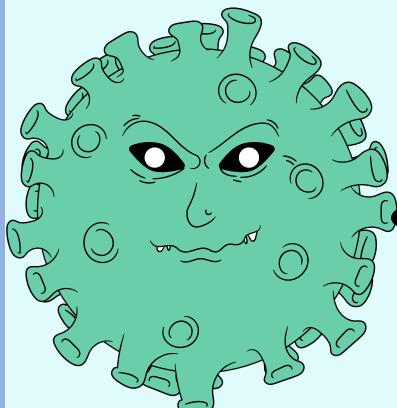

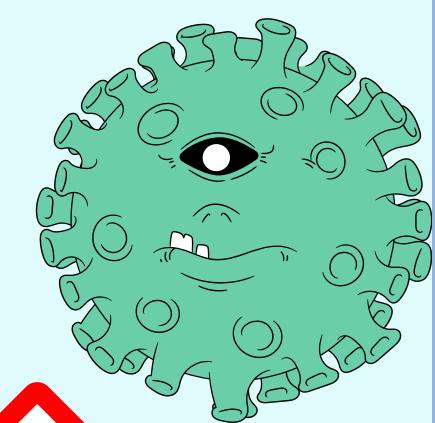

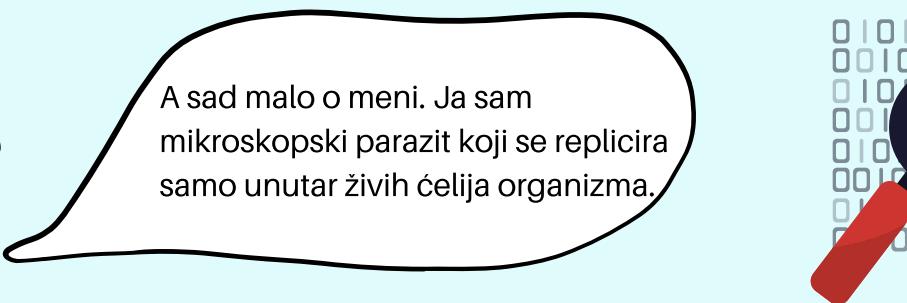

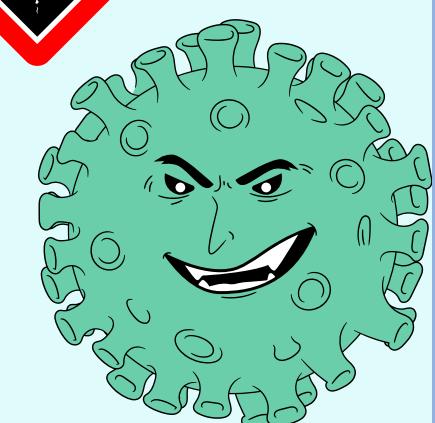

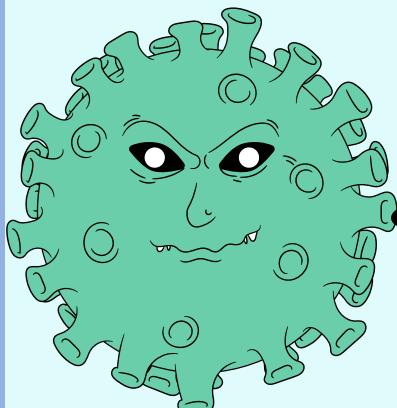

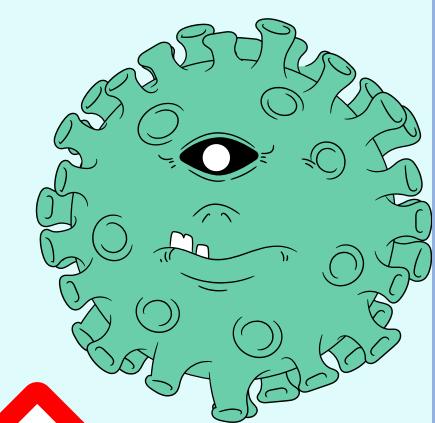

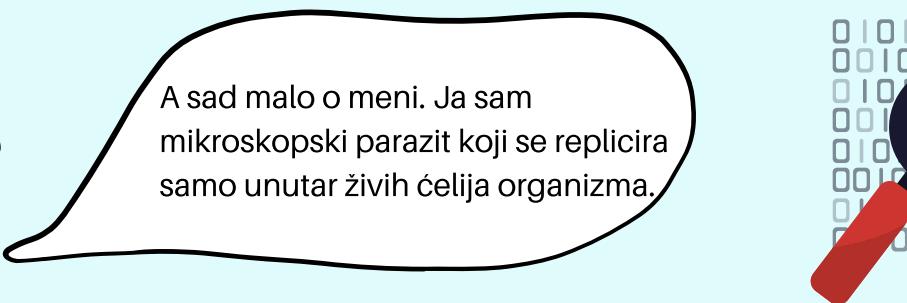

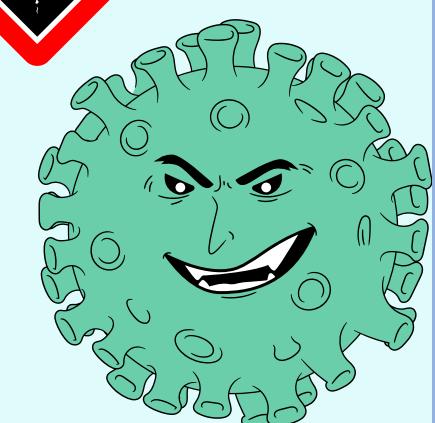

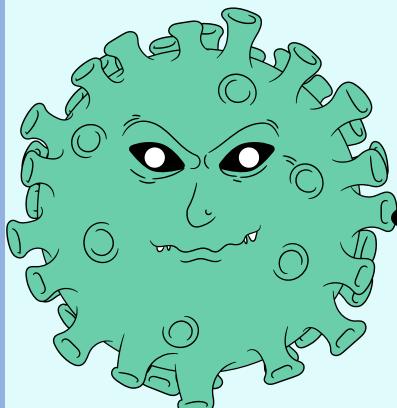

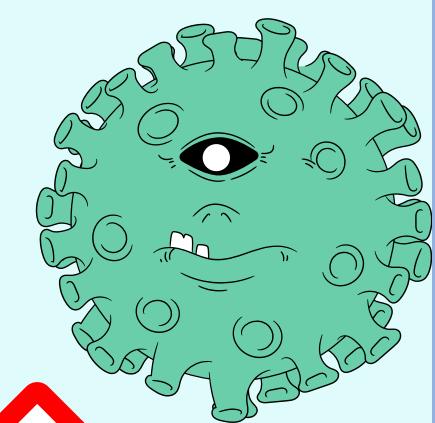

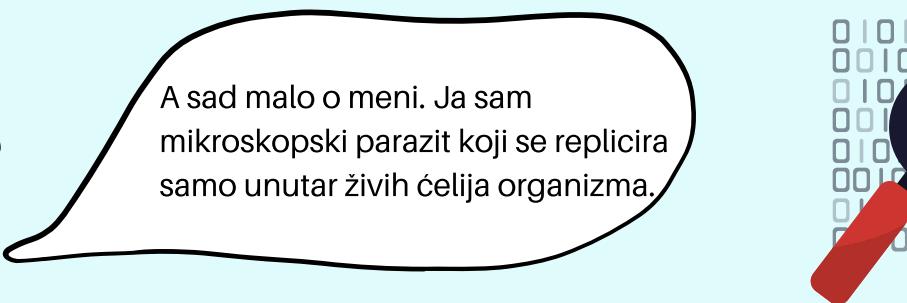

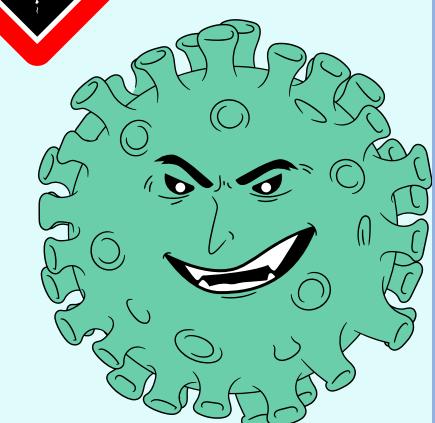

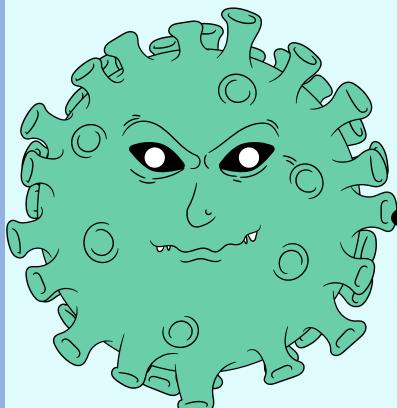

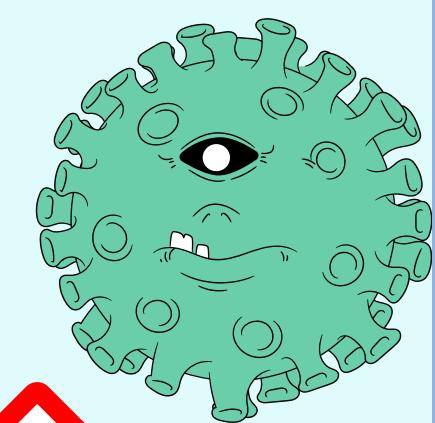

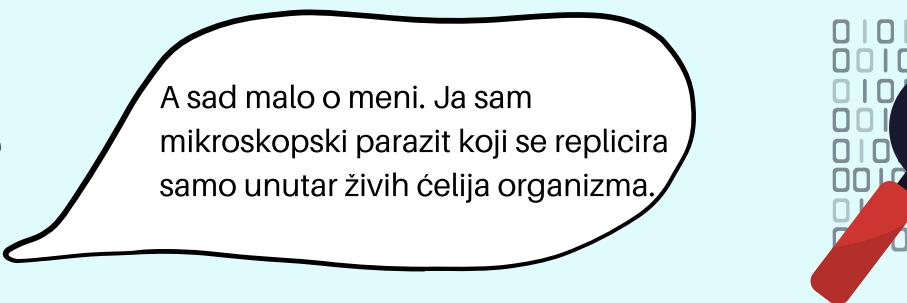

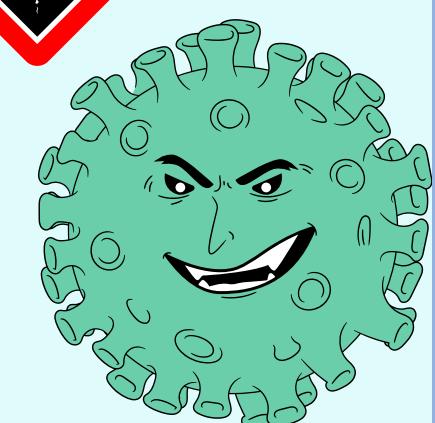

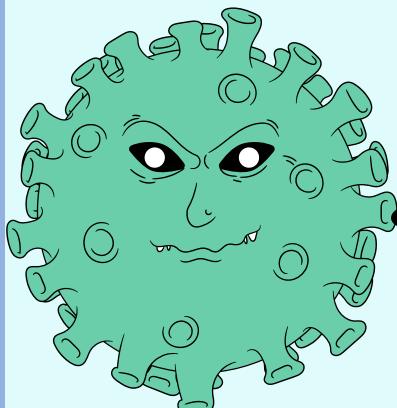

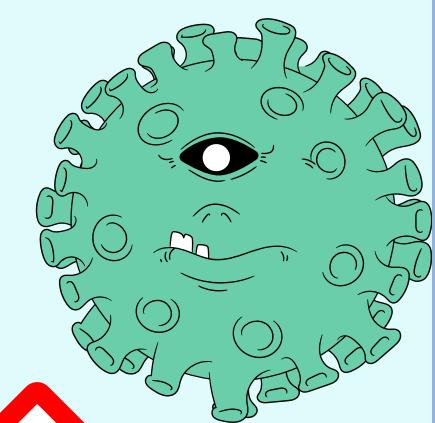

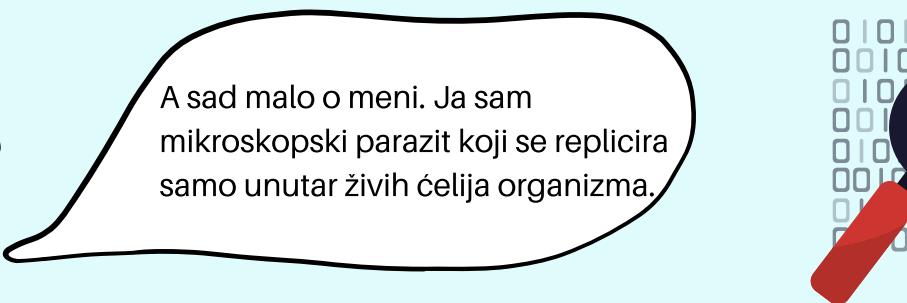

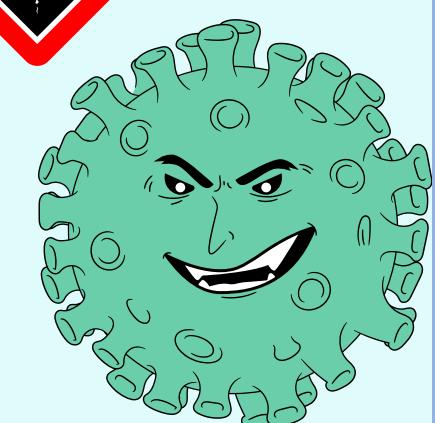

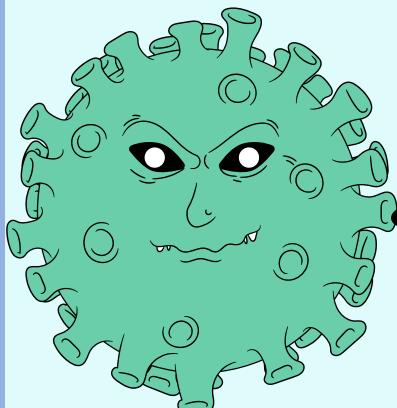

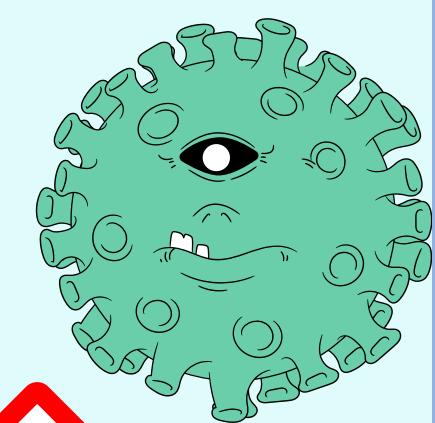

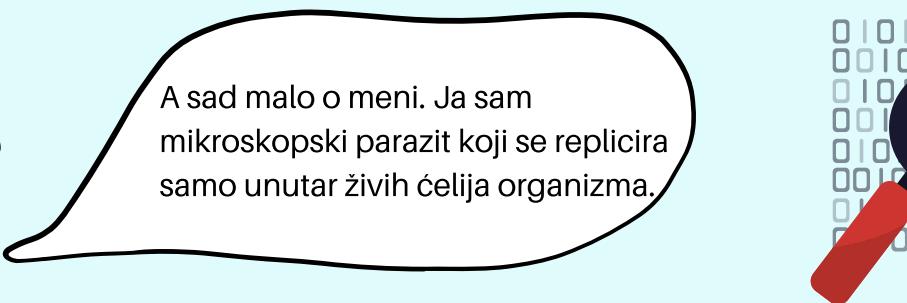

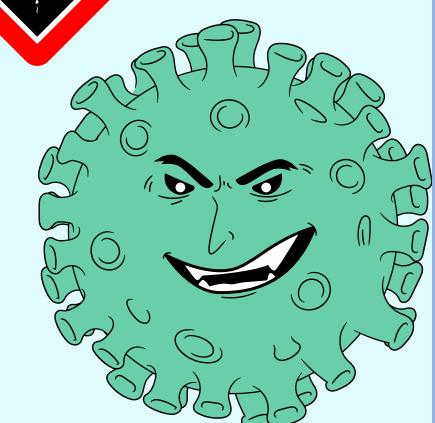

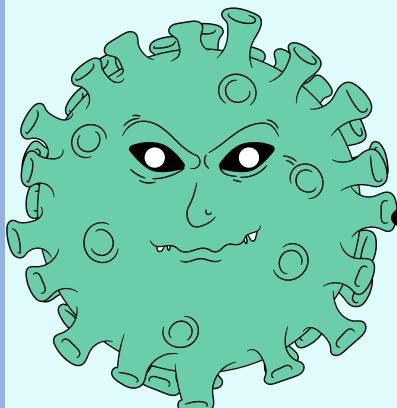

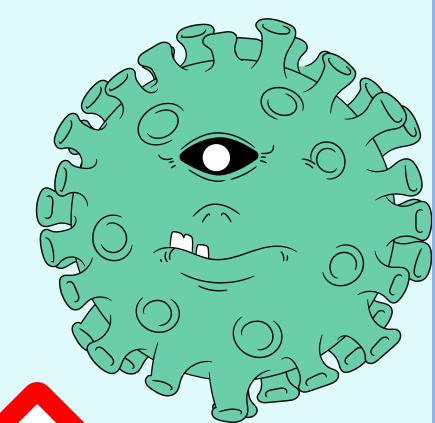

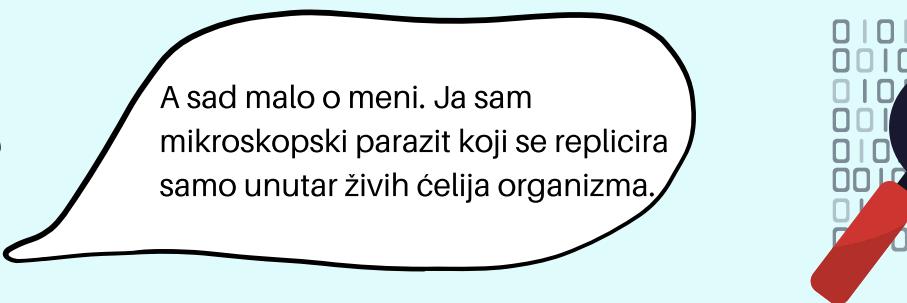

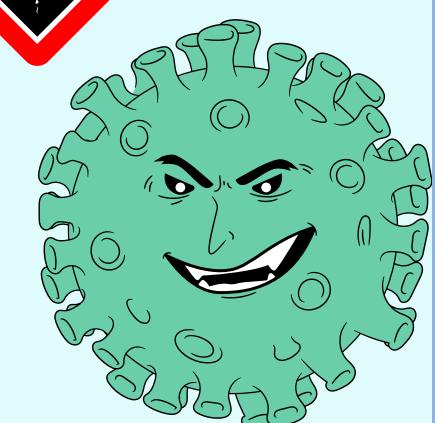

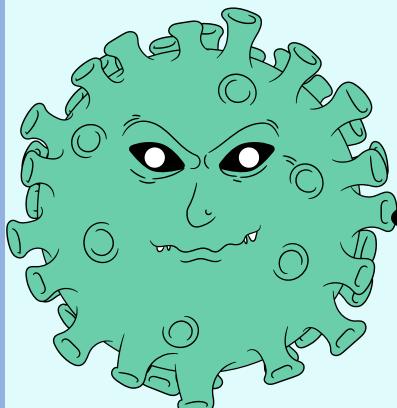

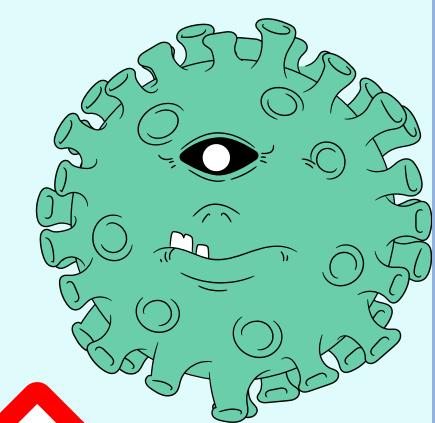

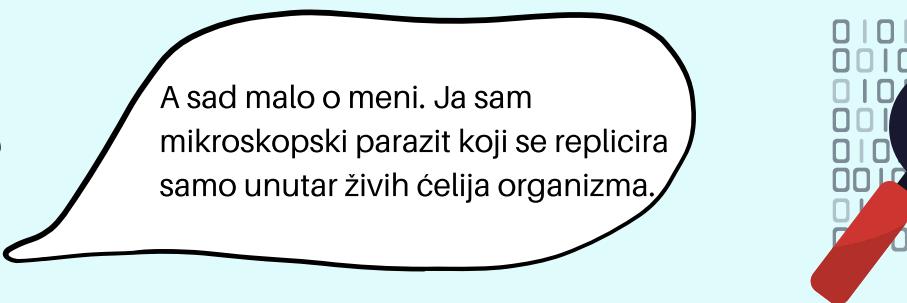

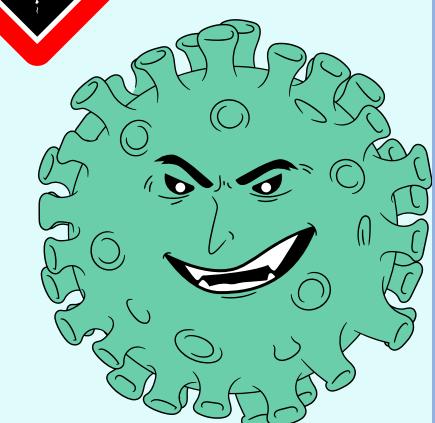

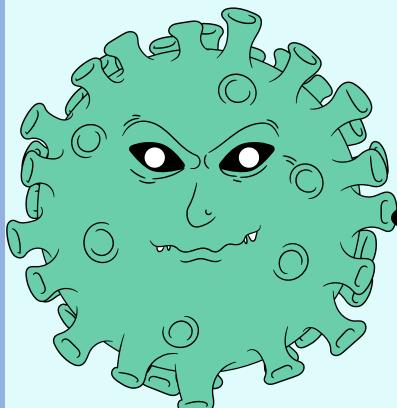

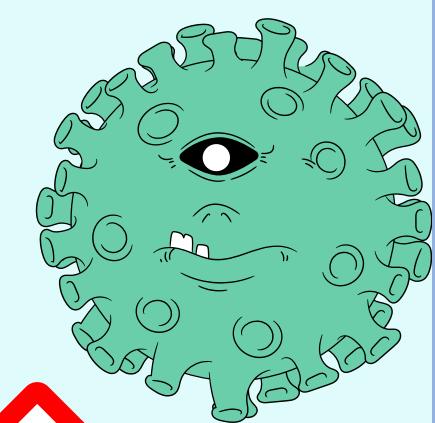

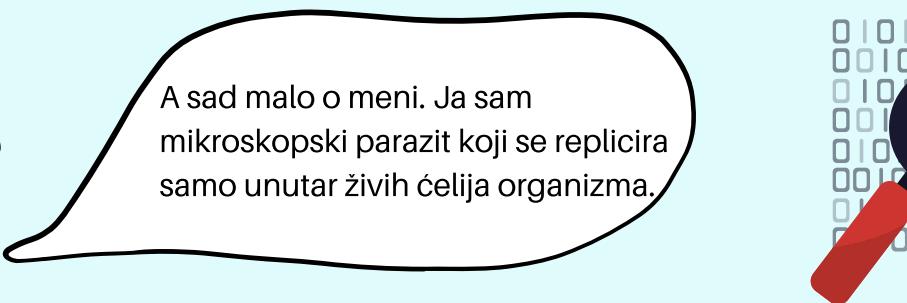

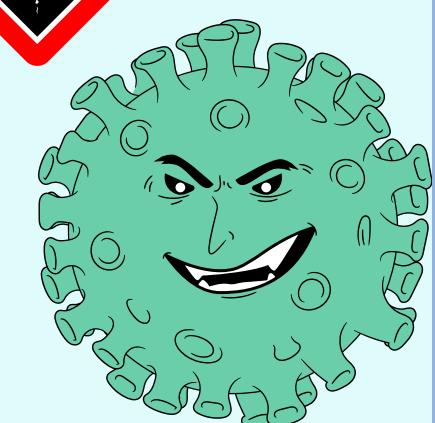

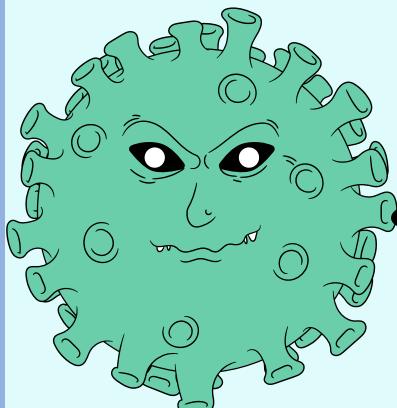

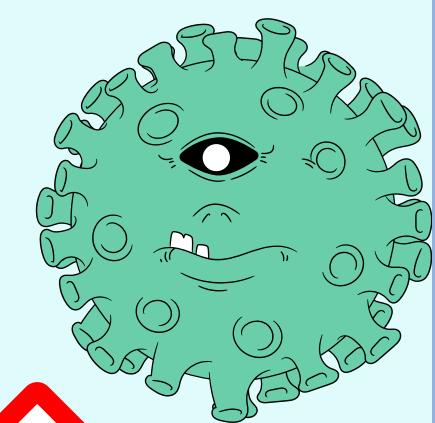

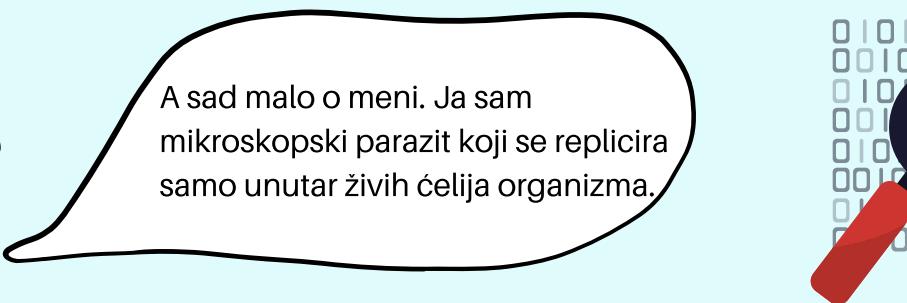

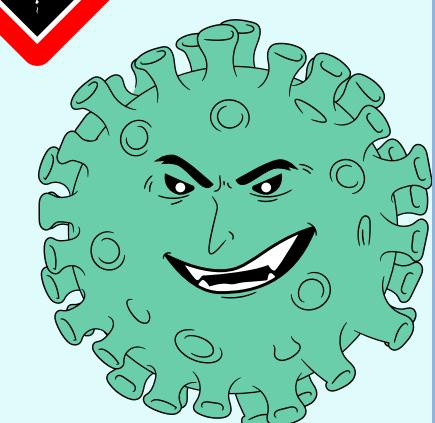

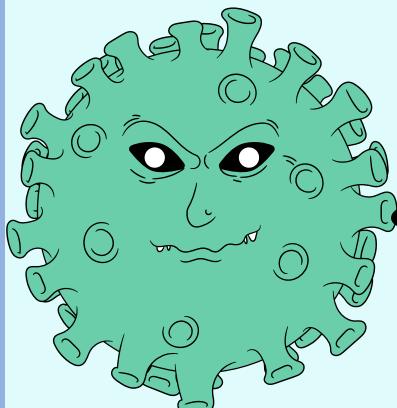

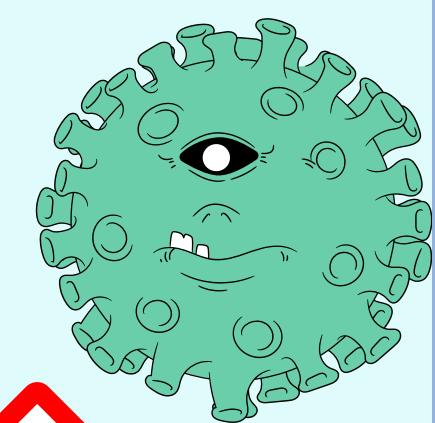

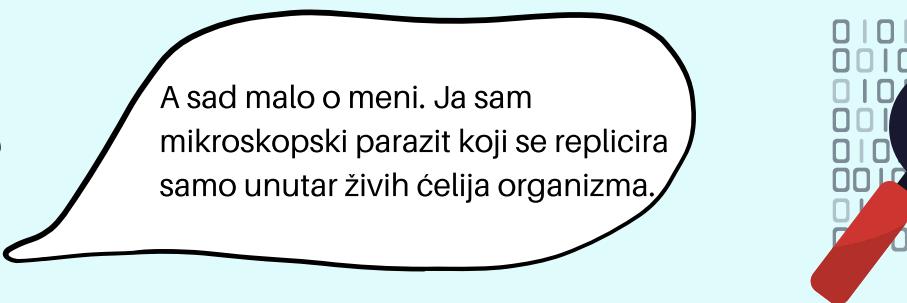

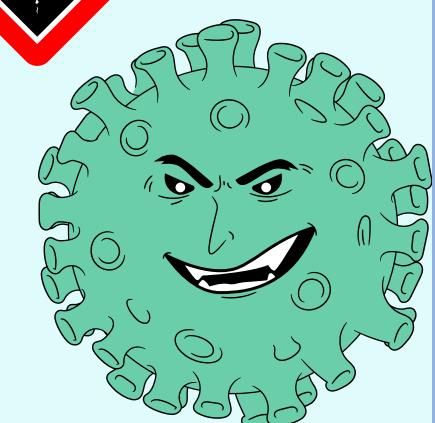

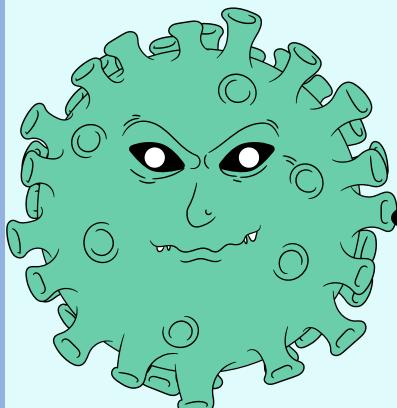

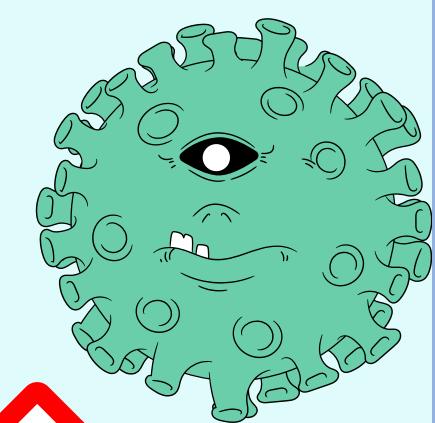

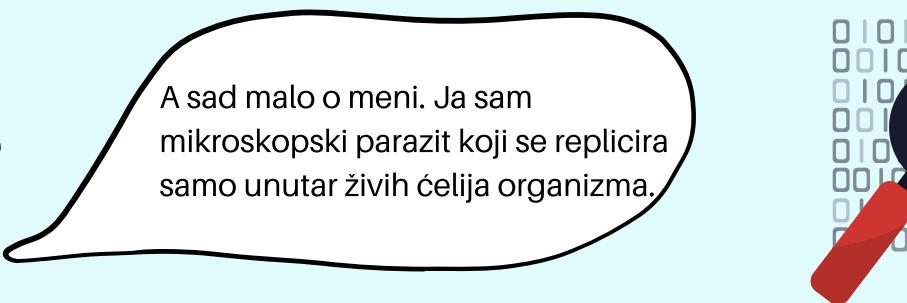

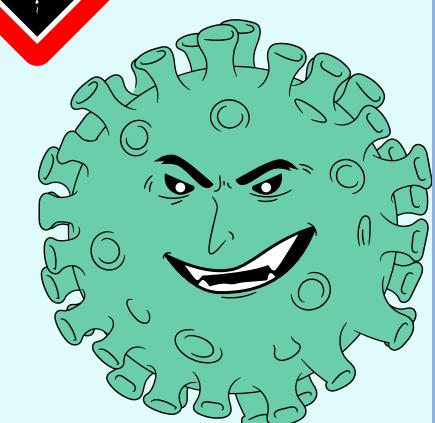

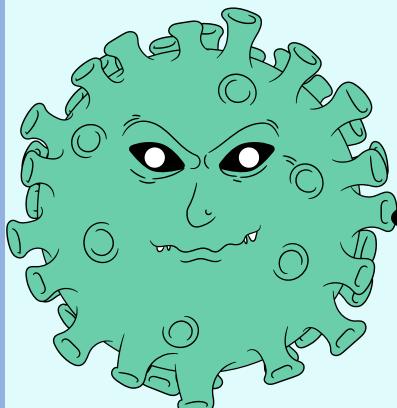

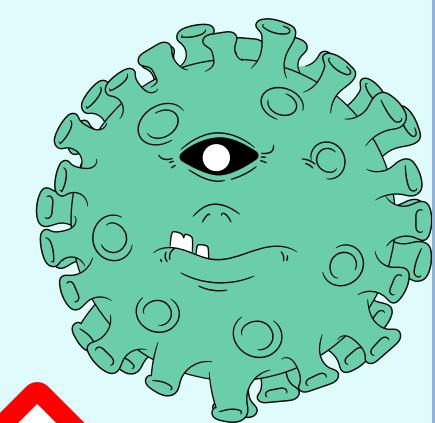

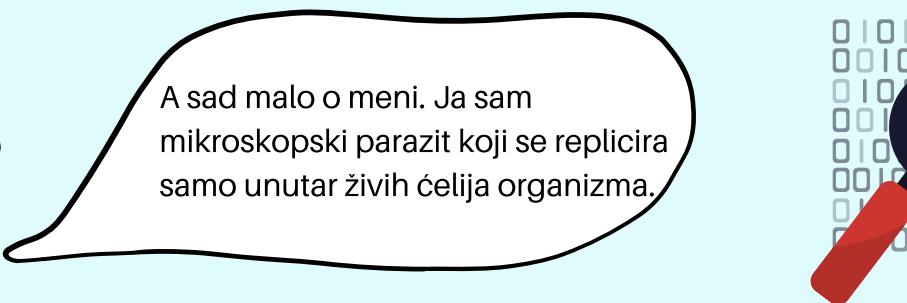

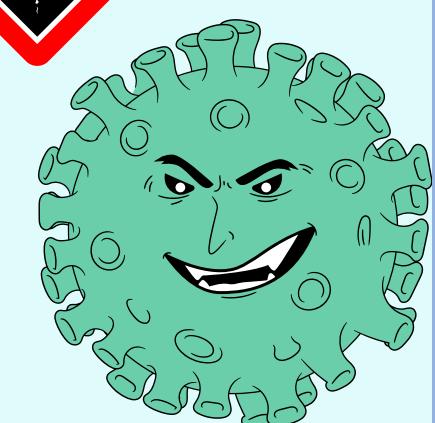

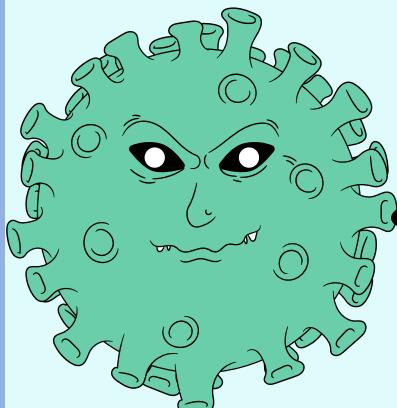

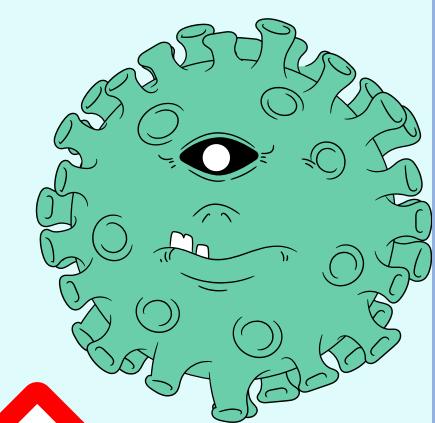

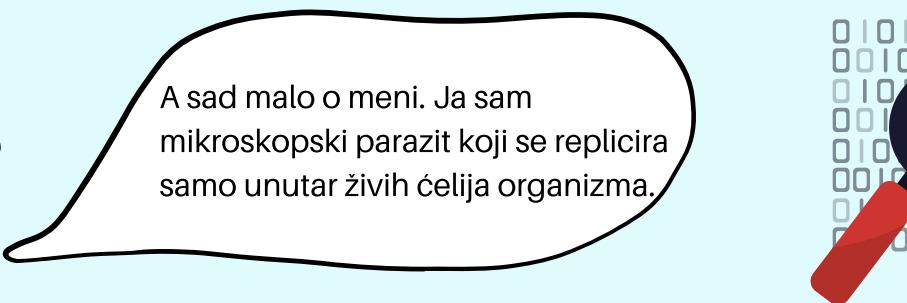

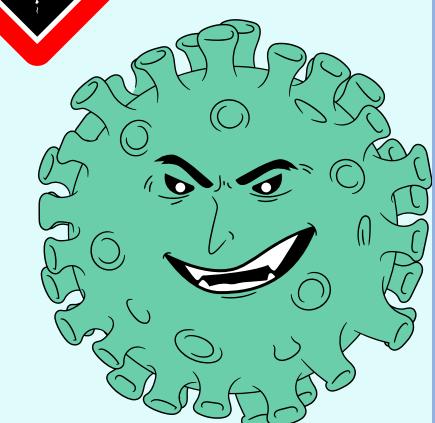

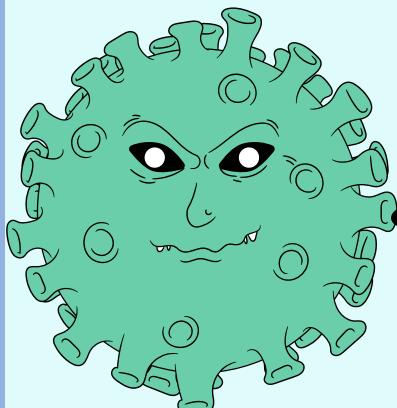

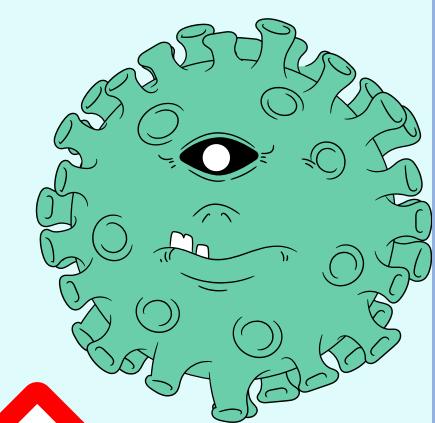

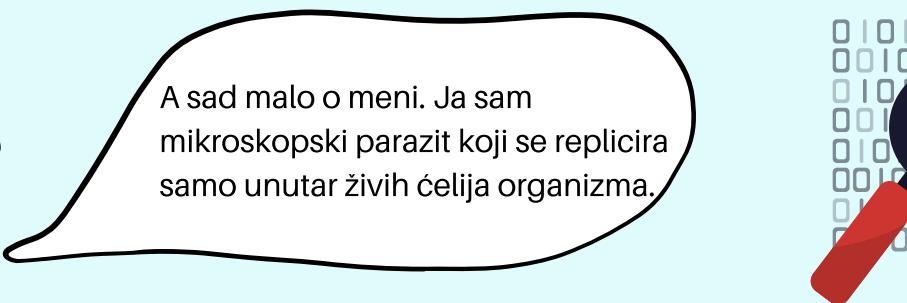

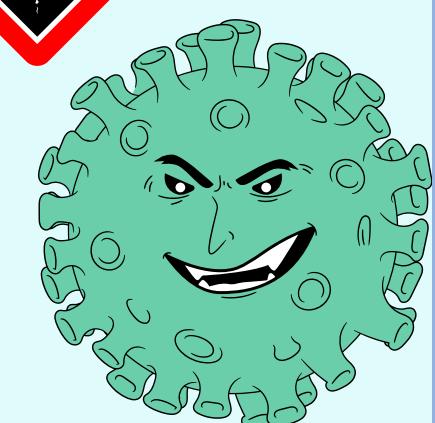

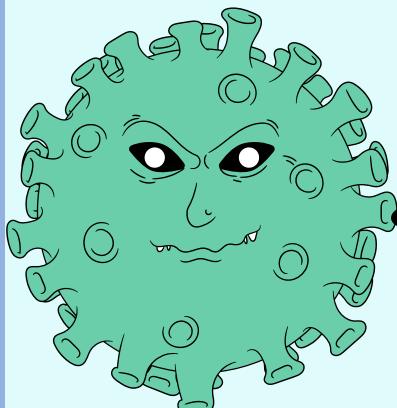

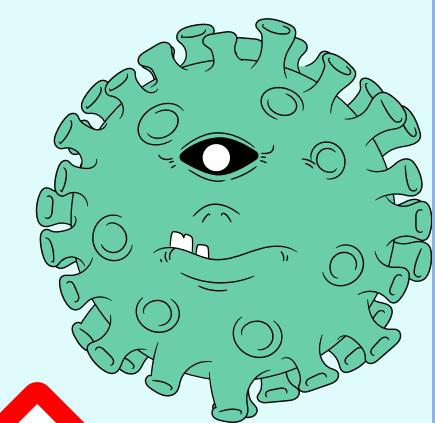

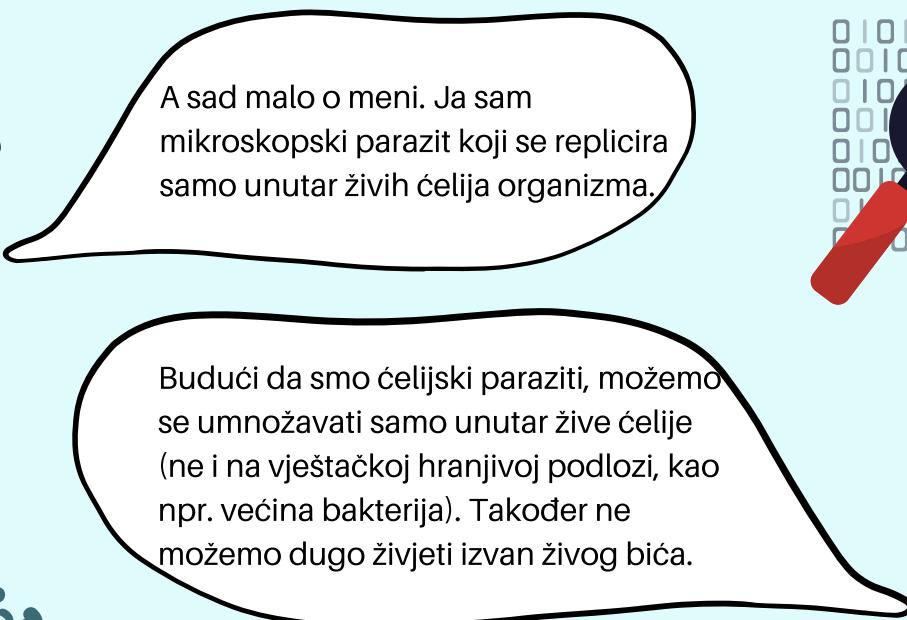

2G - 850 MHz do 1900 MHz; 3G - do 2100 MHz; 4G - dodaje se još i 600 MHz, 700 MHz, 1,7/2,1 GHz, 2,3 GHz i 2,5 GHz. Frekvencijski spektar za 5G mrežu se proteže od 450 MHz do 6 GHz.

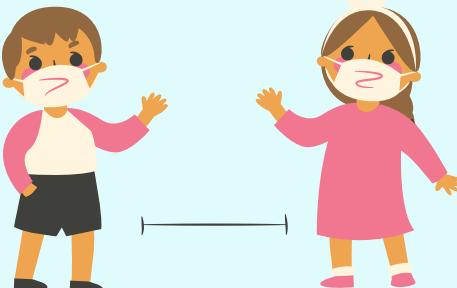

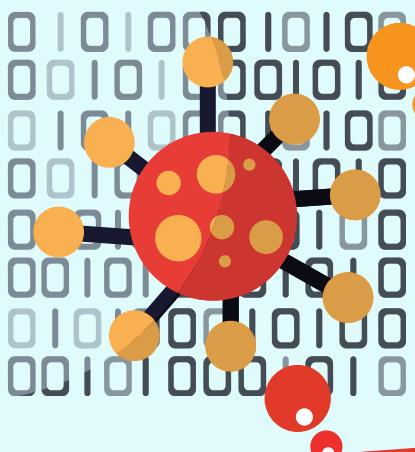

Trenutno u svijetu, pri uvođenju 5G mreže, prisutan je trend gašenja 2G i 3G mreže i njihovih frekvencijskih spektara kako bi se oni oslobodili za upotrebu 5G mobilnoj mreži. Dakle, iako 5G funkcioniše i na većem spektru od prethodnih 2G, 3G i 4G, veliki dio 5G mreže će nastaviti raditi na istoj frekvenciji kao prethodne.

A sad malo o meni. Ja sam mikroskopski parazit koji se replicira samo unutar živih ćelija organizma.

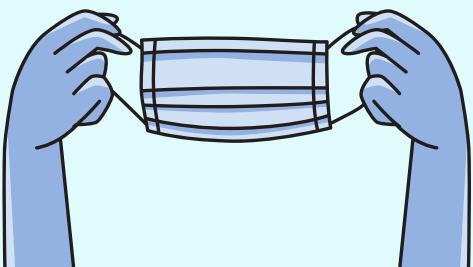

<img alt="Cartoon coronavirus

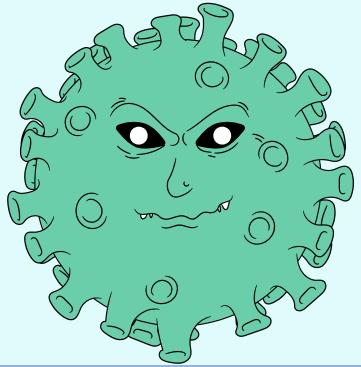

Naziv "koronavirus" potiče od latinske riječi corona, čije je značenje "kruna" ili "aureola", a odnosi se na karakteristični izgled virusnih čestica: imaju obod koji podsjeća na krunu ili koronu Sunca.

Ja sam novootkriveni koronavirus i uzrokujem zaraznu bolest COVID-19. Većina ljudi koje zarazim doživjeti će blagu do umjerenu respiratornu bolest i oporaviti se bez potrebe za posebnim liječenjem. Međutim stariji ljudi i oni sa medicinskim problemima poput kardiovaskularnih bolesti, dijabetesa, hroničnih respiratornih bolesti i karcinoma vjerovatnije će razviti ozbiljnije simptome, a za takve pacijente, nažalost, mogu biti i smrtonosan.

Širim se prvenstveno kapljicama pljuvačke kada zaražena osoba kašlje ili kiše. Kao i svi virusi, da bi opstao i mogao se razmnožavati, neophodan mi je živi organizam, a izvan njega mogu se prenositi samo nekim vidom materije.

Sada kada smo vidjeli pravu prirodu nas, virusa i elektromagnetsnih talasa, postavlja se pitanje, kako su nas uopće povezali? Šta misle stručnjaci o ovome?

„Ne postoji razumna veza između upotrebe 5G frekvencija i COVID-19 ili bilo kojeg drugog biološkog virusa ili bakterije. Ova vrsta nagadanja, povezivanje ove dvije stvari su za pojedince koji su spremni da povjeruju u ne-nauku.“ - prof. Malcolm Sperrin, direktor Odjela za medicinsku fiziku i kliničko inženjerstvo, Univerzitetske bolnice Oxford NHS

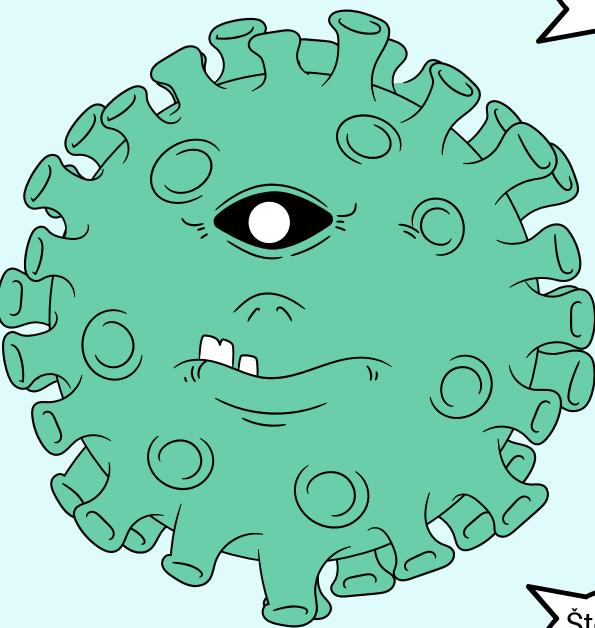

„Mislim da je problem sa svim tim teorijama to što je internet danas svuda prisutan i svi imaju pristup. Na internetu možemo pronaći što god želimo. Ako nas zanima 5G, zanima nas zračenje, zanimaju nas bolesti. Mi nalazimo ono što želimo. Tako je posljednjih dana kod nekih ljudi bila vrlo popularna 5G mreža i to što su je ljudi povezali s virusom. Drugo logično objašnjenje ne vidim.“ - Matjaž Klančar, urednik tech magazina Monitor u Sloveniji.

„Prvo treba reći da elektromagnetski valovi ne mogu proizvesti, prenijeti ili stvoriti bilo kakvu biološku tvorevinu, pa tako ni virus ili bakteriju. Dakle, pandemija bolesti COVID-19 i uvođenje tehnologije 5G nemaju nikakve međusobne veze. Tek su se slučajnošću dogodili na našem planetu u isto vrijeme. Plasiranje lažnih vijesti i teorija zavjere o povezanosti bolesti COVID-19 i tehnologije 5G mogli su izgledati kao neslana šala na društvenim mrežama i nekim portalima. Takva razmišljanja podsjećaju na lovljenje i spaljivanje vještica u doba epidemija kuge, samo što sada umjesto kuge imamo epidemiju koronavirusa, a umjesto vještica imamo 5G.“ - prof. dr. sc. Davorom Bonefačićem, diplomirani inženjer i redoviti profesor FER-a u Zavodu za radiokomunikacije, tajnik Odjela komunikacijskih sustava Akademije tehničkih znanosti Hrvatske (HATZ).

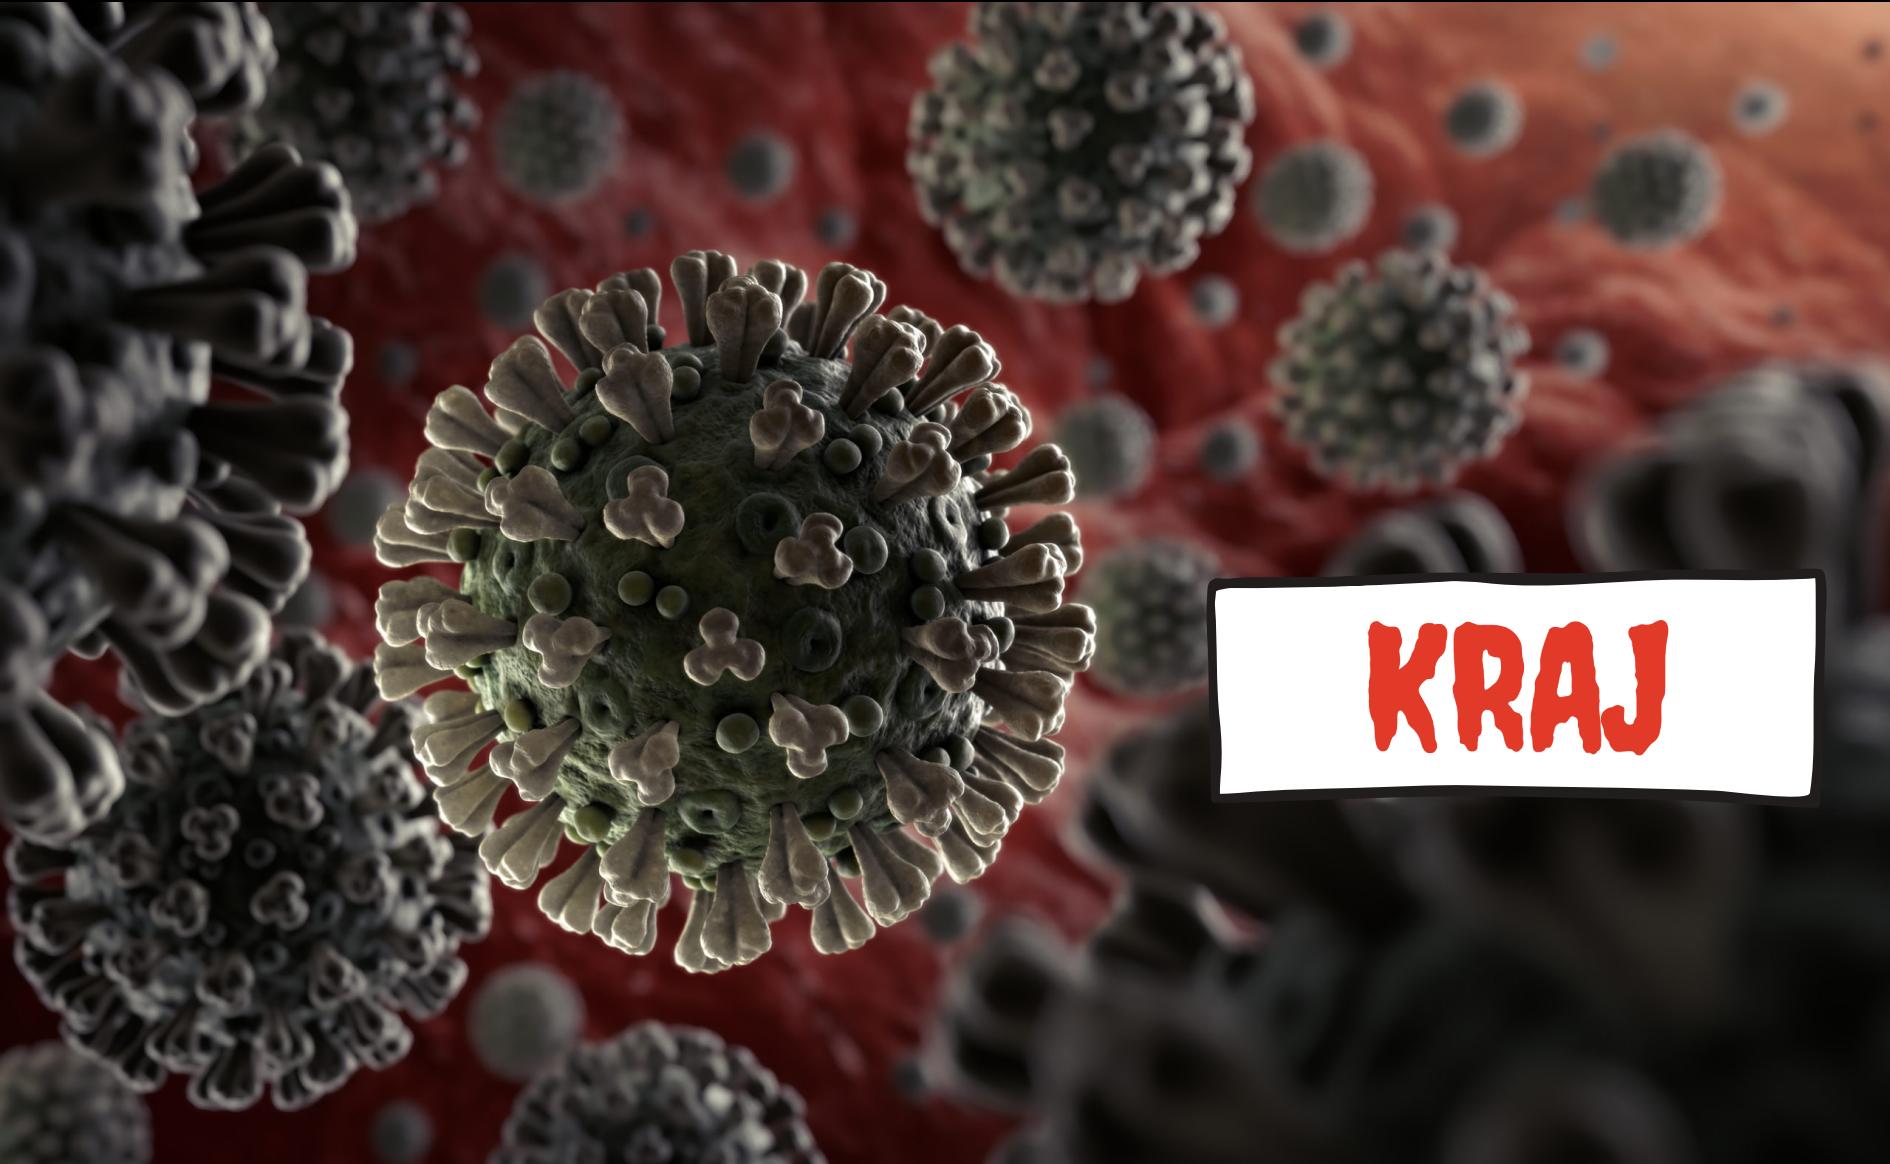

„Kad me netko najozbiljnije pitao, sjetio sam se filma u kojem je kompjutorski virus evoluirao i počeo skakati s ekrana na ljude. I ubijati ih. Gledam ja svojevremeno taj film i ne vjerujem. To s kompjutorskim virusom koji evoluira u ljudski je stvarno glupo. Komad kompjutorskog koda evoluira u komad ribonukleinske kiseline umotan u bjelančevinu? Tako je mogao evoluirati i u komad pizze. Ili, zašto ne, golfa dvojku. Točno tako meni zvuči ta ideja, da koronu prenosi radioantena, jezivo glupa. Kao da se netko prehladi jer je slušao emisiju na radiju gdje je voditelj imao hunjavicu.“ - Dr. sc. Saša Ceci, znanstvenik s Instituta „Ruđer Bošković“, bavi se fizikom elementarnih čestica.

Dakle, ovakve sulude teorije zavjere nastaju kad se kombinuju strah i neizvjesnost s jedne strane i neznanje (ili barem ne traganje za znanjem) s druge strane! Zato, prije nego što izvedete neke zaključke i donešete odluke, dobro se zapitajte da li to ima ikakvu logičku i znanstvenu potporu.

Što se tiče koronavirusa, ostanite sigurni i budite odgovorni, čuvajte sebe i druge oko vas! A po pitanju 5G mreže, upotrebljavajte je bez predrasuda (naravno kada budete u mogućnosti u vašoj državi:) i ne plašite se, jer vas antene nećeobarati s nogu i ubijati, te nećete biti čipovani vakcinacijom ili nošenjem maske.
